Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Please reconsider sheltering the homeless population in public parks. This will take away green spaces from people who pay taxes to use them and giving it to people who are not willing to use resources provided by the city to become functioning members of society. Grant funding for larger shelters that don't have no drugs rules as a way to get them off the street.

Testimony is presented without formatting.
