Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Not only does this affect Portland's real estate market & values of the people who have worked hard to own a home here but the safety of our city & its families...Having had a family member who lived on the streets, the majority percentage are not homeless individuals or families but drug addicted and the mentally challenged who need more than a place to camp...Our city has become a garbage dump & a scary place to live...The decision to allow such a thing tells me the very people we count on to care for our city & its people are not educating themselves as to the true homeless issue in Portland

Testimony is presented without formatting.
