Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

See attached proposed amendments for the Shelter to Housing Continuum Policy. These are intended to increase affordability, reduce undue cost and permitting/code barriers, and support greater diversity of innovative housing solutions.

These recommendations were developed by Heather Flint Chatto (Forage Design & PDX Main Streets), Linda Nettekoven, Garlyn Woodsong (Woodsong Associates), Tim McCormick (Shelter Forum), and Paul Niedergang (Progressive Development Group).

Many thanks to staff and the City for the work on this and especially to Matt Wickstrom at BDS, and Eric Engstrom, Senior Planner with BPS for revising the policy recommendations to include a pathway for Tiny Homes on Wheels (THOW).

Heather Flint Chatto, Urban Planner & Environmental Designer
