Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

it is very unfortunate that the city council has to consider placing the homeless people in our city parks. As many homes, apts and condos have very little green space or none around them, these parks are where people can gather with their families and friends. This will become impossible when the homeless are allowed to use these areas. There has to be vacant fields where this arrangement could be made.
