Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

One important path toward housing is the use of campers, motor homes, vacation trailers, fifth-wheel trailers and Tiny homes on wheels (or park model recreational vehicles). These options allow for secure, dry, heated, and sanitary spaces at far lower costs than many other housing/shelter options. I urge the City to adopt policy that allows long term use of such "vehicles" provided there are campground style hookups for electricity , water, and sewage.
