Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

It is unfortunate that the city's Mayor and council have allowed our Beautiful city to deteriorate- homeless drug users and rioters migrate to our city because there is no punishment for their destruction. Allowing homeless to set up camps in our parks would be the final sequence of unpleasant things in our city. Threatening our homes, children and certainly our investment in our city is not the resolve I have great empathy and have worked with the homeless. Stop the migration and certainly the rioting- there are means and if you continue to allow the destruction it will only get worse as it did last year. It is time that all of you step up with a solution- make the rioters - drug users responsible- you have the means in this state to eliminate them ..take control of this disaster
