Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

This is a lazy and stupid a solution. Deal with the homeless problem professionally and as adults. Stop bickering among yourselves. Stop taking away public spaces paid for by stand up citizens who actually contribute and expect to have these parks for recreation. There is so little leadership here. We all know that 180 days will come and go, garbage will infest the parks and feed the rats, homeless, drug sellers, users, mental cases will come from all over to enjoy this great benefit. It inconceivable you are even this unconscious of your duties.
