Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

This is another attempt to slip in changes to our beautiful city that will destroy its landscape. Opening parks to camping does not consider your constituents who pay the taxes for these spaces with the intent of using the space for their own mental health while living in a city in decline. Property values in downtown and the Pearl have already declined. It's difficult to leave the area and now you want to take the only thing left that makes the area livable. This draft is I'll conceived and will only make the housing problem worse.

Testimony is presented without formatting.
