Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

As a Pearl District homeowner and Portland citizen I think allowing camping in city parks or open spaces will kill the city. 180 days/6 months is a very long time for businesses, homeowners and families to have to put up with the social problems that these encampments present. I do not know what the solution is, but it should not be to allow people to camp in the parks or open spaces (nor on the sidewalks).
