Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Our parks should not be included in allowable zones for camping. Our neighborhoods should not be allowed zoning for people living in campers either. Please make these restrictions clear so there is no chance of it happening. I personally know of at 5 business owners who have moved their businesses out of the city and more than 10 families who are leaving. Keep building it and they will come...more anarchists and the nation's homeless will continue moving here to call Portland home. Is that what the city council wants? The community you are representing certainly doesn't. Portland will continue to be known as the best place to be homeless which will make digging out of this mess we are in even more difficult. You can only tax businesses and high-income earners so much and then they will leave.

Testimony is presented without formatting.
