Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

To whom it may concern, I strongly oppose allowing these kinds of housing in the Portland area and strongly feel that if this continues to go on, it will be 20 years before our city comes back to life. These kinds of policy do not encourage tax paying people to come to Portland for travel, shopping, business, etc, All the activities generate revenue so that we can support parks, police, clean and safe streets, etc. I have lived in Portland my entire life and it is appalling to me that our local leaders are supporting the city being overrun by homeless encampments and mentally ill people roaming the streets. I am in full support of supporting those in need but tiny home and tent encampments within the city district is not the answer. Please put a stop to homeless encampments in Portland.
