Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

This new proposal is way to vague. There needs to be very specific language as to what open land can be used. It can't be left open to interpretation BE SPECIFIC. City park's should NOT be used as camps/shelter areas. There is plenty of areas that can be used. This should not just become a problem for SE Portland as well. All of Portland needs to share in this burden equally and fairly not making one area the shelter dump of Portland!
