Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

It is exceptionally difficult to be homeless but the city parks are not a place to put our homeless. The tent areas I have seen around Portland generally have large amounts of trash that accumulates including needles and syringes We have done tent camping for decades across the US and there are in most campgrounds, hosts, and they are there for a reason. Campgrounds need constant upkeep and maintenance so they do not become trashed Joanne hardesty is well meaning but this is a bad idea
