Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Gabriel Park is home to kids and family during Covid. It is full of play and I take my two babies to the park to play in the grass every day. If homeless shelter go in we would not have a place for my children to play. I can't have my babies accidentally pick up a needle or be threatened by a homeless person. Homeless people need a safe place that isn't a park that is well used by the community.
