Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Members of the council, I am in objection to the suggestion of the temporary sheltering of the houseless in our parks and public spaces. This solution, even though it is described as temporary would cause long term damage in our neighborhoods. This has been a really hard year for all Portlanders, as tax payers we have never relied on our public spaces and parks more as necessary common place to be able to relax and enjoy our outside environment. We need long term solutions addressing the root causes of homeless. Thank you, Julia Hannegan
