Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Information for the record. There is a potential amendment to the proposal (see the P:NW letter) that would involve institutional sites in single dwelling zones - which are typically religious institutions. The attached file is a list of known institutional sites in single dwelling zones (RF-R2.5). This file documents that such sites are found throughout the City, and provides evidence of the number of such sites.

Testimony is presented without formatting.
