Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

We in outer SE Portland and daily accosted and inundated with the homeless camps and the homeless. While I feel we need to render a small amount of help, as it seems not matter what you do with our tax dollars nothing seems to help and I believe you are growing the problem, if you must add more spaces do not use parks, or any other PUBLIC lands. When the homeless take them over they become dangerous for families to use because of alcohol, drugs, mental health issues and just plain filth. If you must open more areas, and I would hope you do not, how about in the western side of the city? Let all of us enjoy the pleasue.
