Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Why would the city ever consider allowing the homeless to camp in public places like our parks? Do you we the sidewalks, sides of highways and downtown with rotting trash and human waste? Do you really want these problems to further harm our neighborhoods? I'm sick of this narrative that these are people who can't afford housing or are down on their luck. These people steal, shoot in drugs and commit serious violent crimes in our neighborhoods and then get charges dropped by our limp dick district attorney.
