Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

If the city is bent on killing off any livability left then by all means proceed by expanding the areas in which homeless can destroy this city more. Oh that's right they don't care where they are allowed to camp as it is! Why do we even waste our time debating rules on where camps can exist when they already exist in our parks and are already blocking sidewalks and starting fires. The rules and laws don't apply to the homeless in Portland. In fact let's empty their RV's for free on the tax payer dime! Oh we already do that. Tax payers work our asses off and pay taxes only to have homeless addicts destroy everything our taxes pay for. We need to bring the poor farm back and send the homeless there to earn their room and board instead of draining tax dollars. Our city leaders are incompetent and enable drug use and crime. No other city allows what Portland allows.
