Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

I am disappointed by this proposal because it does nothing to really address the problem of homelessness. This just disperses the houseless population across the city, where they will have less access to resources and no real assistance with getting the help, medical or otherwise, to actually help move them out of homelessness. This is a band aid that allows the wound to fester underneath without understanding the cause or treatment of the wound.
