Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

If there is no intent to site outdoor shelters in parks, trails, golf courses, community centers and their parking lots, then why are you so reluctant to exempt them, like you exempted wetlands and riparian zones? Just asking us to "trust you" relative to your good intentions is not good enough. You need to either remove the OS allowance, or somehow include the intent in the language of the code changes, especially since this will now be a permanent code change, not just a temporary one.

Testimony is presented without formatting.
