Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

1. This proposal does NOTHING to help our houseless neighbors. It does NOT provide sewage, water, transportation or necessary services. 2. Living in city parks does a disservice to all of us. The mission of the parks is for visitors of all ages to enjoy the space. 3. The City needs to do the hard work of finding real solutions, such as partnering with social services, non profits and organizations dedicated to helping our houseless neighbors. 4. This 'temporary' solution is not good for houseless nor housed Portlanders alike.
