Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

To whom it may concern: At this most precarious time in our history, citizens of Portland are at a cross roads as to whether we put our all into the struggle for dignity and relief for our fellow citizens living outside. Putting our all requires us to move in ways that are uncomfortable and pushes us to grow as a city. Please allow the Shelter to Housing continuum measure to expand temporary shelters on public and private properties on a limited basis so we can create spaces so everyone can have safe place to rest. Thank you.
