Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

This is extremely important: Camping in streets, parks, sidewalks or anywhere the public works, plays, walks, or otherwise uses the space as taxpaying citizens must not be permitted. I have to believe that commissioners and bureaus have had an earful concerning this point. No Unmanaged, unsupervised, or General Camping can be allowed. It's become a serious safety and health issue. No one should be made to live in a tent on a sidewalk or a street or a park. All efforts by this proposal needs to go towards creating managed shelter spaces only. **NO CAMPING ON THE STREETS AND PARKS OF PORTLAND.**

Testimony is presented without formatting.
