Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

The Federal, State, County, METRO and City need to come to the table and get a total grasp on the situation and create an organized plan to work with this global problem. METRO was just authorized a large bond to work on houselessness. Why is the city making a permanent change to code without working with these governments. From my tax-paying view, the bonds for better parks in Portland was setting up camping for the houseless..not the families that need open spaces that are safe. These Shelter to housing initiative is like a party invitation to the entire west coast and beyond. When will the taxpayer be heard!
