Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

As a person who often has houseless camps in my own neighborhood (Woodland Park), I really appreciate that our city leadership is looking for new creative ways to help support people who are houseless due to our regions emergent lack of affordable housing. I support utilizing public spaces, including plans that impact grass (which is a renewable resource). This plan will have a positive effect on our immediate neighborhood and can hopefully carve out safe spaces for houseless people and families.
