Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

I support S2HC because it will make it easier to site homeless shelters in a variety of zones, and it's urgently needed everywhere in the city to address the housing emergency. The code change will increase housing flexibility by allowing group living configurations more broadly, including making dormitories, senior care facilities, co-housing, and single-room occupancy apartments will be easier to build -- which will give more people more opportunities to be safely sheltered and housed. Please don't delay, and vote to support our community's houseless members by making it easier to get them the housing support they need, as quickly and easily as possible. Thank you.
