Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Good morning all, Thank you for listening to my thoughts. I have been a resident for many years in this wonderful lovely State of Oregon, county of Multnomah and City of Portland. I am interested in helping the less fortunate people and i believe that there are better sites than along the freeways , under bridges, in boats, RV's, and along bike trails for them to live. Lets find a common place for all of these people to reside, get services, medications and counseling if needed. I love our beautiful city . Lets be responsible citizens and mind our spaces. Its all relative. I believe A beautiful place to live brings more happiness for everyone and and a happier business and social society.
