Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

As a woman over 60 who is from this city and loves this city I don't think your proposal of letting the homeless live in the parks is a rational or smart idea. It is already getting questionable to walk around this town by yourself which is something I do regularly, this idea will make it worse. There is also garbage and all the other junk that the homeless leaves everywhere- they will positively ruin our beautiful parks it can go no other way! Please do not vote for this proposal I implore you!!
