

# AMENDMENTS

**Water, electrical and Sanitation in Tiny Homes on Wheels:** Create an “all of the above” strategy to **allow opportunities for off-grid living:**

1. **solar panels and batteries for power**, rather than a required electrical hook-up;
2. **portable water tanks or other containers that are manually refilled**, rather than a site water connection, to provide potable water;
3. **greywater systems for bar sink and shower drainage**,
4. **composting toilets\* and/or drain to tank and pump approaches** to provide for sanitation needs in innovative housing demonstration projects, especially those involving tiny homes on wheels.

*\*Composting toilets are allowed by Oregon building code since the 1970's. Link to ReCode Information and precedents. Art Farm has a THOW with a composting toilet.*
