Testimony to **Portland City Council** on the **Environmental Overlay Zone Map Correction Project, Recommended Draft**

To Mayor and City Council: I am a long time supporter of Portland Audubon, someone deeply committed to the social justice and many economic development goals of our city. I strongly encourage you to protect our natural resources, a vital part of a healthy Portland, by adopting the Ezone Map Correction Project. • Updated Ezone maps are needed to replace the existing inaccurate maps and allow the City to meet its own natural resource protection policies. This project will ensure Portland's long-standing natural resource protections will be applied correctly and as intended. • Protecting Portland's streams, wetlands, steep slopes, forests/woodlands, and wildlife habitat has never been more important. Given the climate crisis, we know that flooding, landslides, and wildfires are becoming more frequent and intense. The updated Ezone maps will help mitigate the climate crisis by better protecting its streams, floodplains, wetlands, and forest/woodlands, which in turn sequester carbon, mitigate flooding and landslides impacts, and help cool and purify air and water, and provide habitat for threatened and endangered fish and wildlife. • This project reflects substantial public investment and unprecedented "boots on the ground" and connection with property owners. This project has been a huge investment for the city and the community. For more than three years the staff went to meet with Portlanders at their own meetings, and conducted more than 600 site visits to individual properties where property owners and staff conferred about the effort and the natural resources on the site. Thank you! Paul Lipscomb -- Paul Lipscomb 503-784-9471
