## NOTES:

\*The biweekly rate is computed by multiplying the HOURLY rate by 80. There are 26 biweekly periods in a year.

\*\*The approximate annual rate is computed by multiplying the HOURLY rate by 2080 and rounding to the nearest dollar.

\*\*To calculate approximate monthly rates, divide the annual rate by 12.

\*\*\*The approximate annual rate shown in this table will not always match annual rates shown in the City Budget since the Budget must account for the exact number of work
