Dear Mr. Yerkovich:

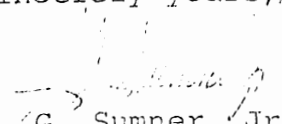

STATEMENT OF COMPLIANCE

I hereby certify that the RECORDAK MICRO-FILE AHU film used to record these documents is classified as safety photographic film. Photographic films are classified as safety photographic films if they are difficult to ignite, slow burning and low in nitrate nitrogen content. The inclusion of the word, "SAFETY" in the edgeprint occurring at intervals along the edge of the film indicates film manufactured in compliance with PH1.25 "American Standard Specifications for Safety Photographic Film."

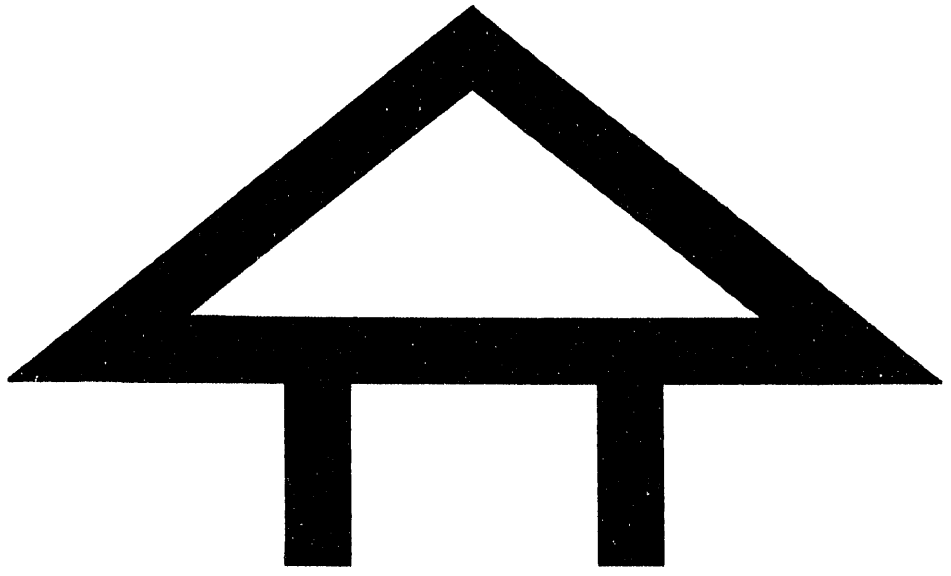

The solid archival triangle in the edgeprint indicates that the film meets the requirements of Federal Standard No. 125a, "Film, Photographic and Film, Photographic, Processed: (For Permanent Record Use)."

Film processed in the Prostar Processor, when installed and operated according to the instruction manual, "How to Use RECORDAK PROSTAR Film Processor Model DVR" and service manual #546, is capable of processing the AHU film to meet the requirements of PH1.28, "American Standard Specifications for Photographic Films for Permanent Records."
