E. Approval is subject to the following conditions:

1. It must be shown that one of the following is achieved prior to design review approval or building permit issuance for the first vertical development, whichever comes first:
 - a. The private stormwater management system can be designed to meet the requirements of the SWMM and so any offsite stormwater discharges are limited such that the total peak wet weather flow rate from the aggregate zone change site – both storm and sanitary – do not exceed the current estimated peak flow of 3.87cfs during the 25-year, 6-hour design storm (or updated rate from BES staff if appropriate to reflect system changes and/or modeling assumptions). If building and stormwater designs for the other parcels within the zone change site are unknown, wet weather flow calculations must assume offsite stormwater discharge in compliance with SWMM flow control standards for those future projects; or
 - b. The applicant or owner will be required to improve the public sewer system or provide mitigation to offset hydraulic risk due to discharges above the current estimated peak flow rate (or updated rate from BES if appropriate to reflect system changes and/or modeling assumptions).
2. The applicant must submit stormwater management reports with the results of infiltration testing for all subsequent land use and building permit reviews for future development of the subject properties.
3. In addition to the step-down height limits stated in Zoning Code Section 33.120.215.B.2 and Table 120-3, development on the site must meet the following additional step-down height limits:
 - a. For the West Property, along the roughly 125-foot length across SE Milwaukie from single-dwelling

- zoning, building height within 15 feet of the east lot line is limited to 45 feet; and
- b. For the East Property, building height within 15 feet of the north lot line is limited to 35 feet.
4. Maximum height on the lots designated as RM4-zoned by this decision is limited to 65 feet.
 5. Discretionary Design Review is required for initial redevelopment of the site, including both the West Property and the East Property. Level of review will be determined by Zoning Code Section 33.825.025.A and Table 825-1. After primary buildings have been constructed, subsequent alterations may meet Design Standards if eligible.
 6. Development on the West Property shall not include permanent disturbance area within the River Overlay Zone located on the West Property at the time of this decision.
 7. All new development on the West Property is subject to Bird-Safe Glazing standards of Zoning Code Section 33.475.235 on the exterior of west-facing façades.

Impact Statement

Purpose of Proposed Legislation and Background Information

The request is not for a legislative action, but for approval of a Type III quasi-judicial land use review. The request is to amend the Comprehensive Plan Map and Zoning Map designations on the site.

Quasi-judicial procedures described in Zoning Code Chapter 33.730, commonly known as land use reviews, are handled by the Bureau of Development Services. Quasi-judicial procedures specifically describe the City

Council as the decision-maker for Type III Comprehensive Plan Map Amendments and concurrent review requests, per 33.730.030.F.3.a(2).

The Hearings Officer has recommended approval of the land use review with conditions. Staff will be presenting the Hearings Officer's recommendation at the hearing.

Financial and Budgetary Impacts

This is not a legislative action. There are no costs to the City associated with this quasi-judicial land use review. The City resources necessary to review the application are covered by the land use review fees paid by the applicant.

Community Impacts and Community Involvement

The standard public involvement procedures for a Type III land use review process have been followed. A public hearing with the Hearings Officer was held regarding the proposal. The proposal and BDS Staff Report were contested by the Sellwood-Moreland Improvement League and numerous residents of the two neighborhoods, and nine members of the public testified against the proposal. The most common objections were concerns about landslide risk; environmental degradation; neighborhood characteristics; and traffic and parking impacts.

The Hearings Officer addressed each area of testimony in his recommendation and concluded that, on balance, the proposed amendments to the Comprehensive Plan Map are found to be equally supportive of the Comprehensive Plan as a whole compared to the current designations. The Hearings Officer retained all recommended staff conditions except one.
