Testimony to **the Planning and Sustainability Commission** on the **Floodplain Resilience Plan, Proposed Draft**

The PSC should adopt the entire Floodplain Resilience Plan which will protect our communities against the impacts of climate change and extreme weather events, protect water quality, and provide fish and wildlife habitat. Title 24 amendments must be restored to the Plan This document has been many years in the planning and we should go ahead and do it now instead of waiting for flooding in this city.

Testimony is presented without formatting.
