At ;last a comprehensive program that begins to solve the problem Homeless street camping is unsafe, humiliating, does not provide the help that these people need for a path forward, and is a scourge on our beloved community Establishing tent camping sites gives street campers choices as to where to go that is a step forward rather than just setting a tent down the street after a sweep. Making unauthorized street camping an offense provides the stick to make this program work

Devert money being spent on programs that haven't worked to get the job done.
