Good Day Council

The proposed program that Ryan and Wheeler have presented is upsetting in its incompleteness and its cruelty. This is so poorly researched: no budget projections, the organizations and services that would be involved were never consulted, and there is no indication that any of the houseless members of our community were consulted about what their needs are.

Council, this program is cruel in its current state as it would penalize people who are the victims of greed and neglect. If you want to incentive people to use a service/program, there is no better way then create something people want to use and have easy access to.
