I'd like to testify again Agenda Items 899 - 903:

These solutions aren't long lasting and flexible for the many needs of our houseless neighbors. We need longer lasting solutions that help them into permanent housing that work for them. We need to also stop the problem at the root, make housing more affordable for all, and stop putting more money into developers' hands. These solutions prioritize the comfort of people who are privileged with a home and not equitable.
