

3/11/19 HLC I5RQ Briefing Summary

- How does the project provide specific economic opportunities to minority business?
- Has there been any discussion with neighborhood groups about cultural areas and buildings that are important but did not meet the criteria?
- Define adverse effect?
- Provide an image of relationship of the APE and Eliot Conservation District, as the APE does overlap the Eliot CD boundary.
- What provisions are being contemplated on the lids that support the density goals adopted in area?
- What zoning would the newly created land get?
- Is there any land acquisition needed?
- How do you weigh the environmental costs of concrete being added to the value of community space being added? Is it worth spending half-billion dollars on the lids to provide a small community space?
- Is this project seismically structured to handled 9.0, like the Burnside Bridge?
- Return in public urban design phase.
