

To the Hon. Mayor & Common Council of the  
City of Portland

The undersigned, would respectfully  
call your attention to the fact, that, a large body of  
water, coming down chiefly, from some one or more of  
the ravines of what is known as Robinsons Hill,  
in the South west part of the City, for some season,  
is now, and has been for several weeks during  
the present winter, forced to flow so that the  
entire body enters Harrison Street at its int-  
ersection with 3<sup>rd</sup> Street, thence following  
Harrison to the bottom east of Front Street,  
thereby causing great damage to property located  
on said street.

While it is expected that a fair share of water should  
flow down said street, said Street ~~to~~ east of 3<sup>rd</sup>,  
is now, from some cause, being made the channel  
for the conveyance to the River of an amount of  
water, which it is believed should be distributed  
amongst perhaps a half dozen streets

Respectfully

J. P. Condit
