Attachment B: 2030 Regional Waste Plan (RWP) Indicators Reporting

The RWP indicators represent a new form of reporting to Metro. The indicators aim to shift reporting from output to outcome-focused data that measures impacts at a high level to inform regional policy and track progress toward RWP goals. The definition of desired impacts for certain RWP actions and goals is in progress; hence, the scope and format of some indicators will evolve toward outcomes measurement as recommendations from regional work emerge.

Local governments are invited to contribute to these RWP Indicators and be represented in the annual RWP Progress Reports. This Indicator reporting could involve providing Metro with primary data using a report template as well as assisting Metro in collecting data (through, for instance, providing information or coordinating with haulers).

The following table contains a list of RWP Indicators that Metro is collecting data on for the calendar year 2023. The goal is to receive indicators from the priority indicators section. The first section identifies priority indicators for any jurisdiction to report on. The second section identifies indicators that may relate to some but not all jurisdictions. Metro may contact individual jurisdictions about specific indicators in this section.
