PROJECT PURPOSE STATEMENT

Portland’s Inner Eastside consists of high opportunity neighborhoods close to the Central City. This study will provide clarity on available infrastructure capacity and potential constraints to create the foundation for future planning and up-zoning to encourage housing production, expand housing options, choices, and affordability levels.

The Inner Eastside project area spans roughly from NE Fremont Street in the north, SE Powell Boulevard in the south, 7th Ave north of I-84 and 12th Ave south of I-84 to west to 60th Ave to the east – an area of about 5,800 acres (6% of the city’s land area) of which 72% is zoned single-dwelling residential, 13% multi-dwelling residential and 16% commercial/mixed use.

PROJECT OVERVIEW AND MANAGEMENT

Overall management of the Project will be the responsibility of the Grantee as assisted by the DLCDC Grant Manager. Specific Project management duties of Grantee will include:

- a. Organizing and managing the project team;
- b. Selecting a consultant and contracting for consultant services;
- c. Overseeing consultant work described in this Project Description;
- d. Scheduling and managing meetings, including activities such as, preparing and distributing meeting notices, agendas, and summaries; and assisting the consultant with meeting facilitation.

Advisory Committees

The City will employ the Inter-bureau Infrastructure Coordination Team to serve as the project technical committee. The Team will meet on a regular basis to review technical analysis and recommendations prepared by City staff and the consultant. Individual members will be responsible for communicating with officials from their respective bureaus and to ensure that policy issues are incorporated into technical work at the appropriate time and in the most effective way.

Agency Role

DLCDC will provide financial, administrative and technical assistance to the Project. DLCDC supports the collaborative, regional approach envisioned in the Project and agrees to work equally and fairly with each jurisdiction to help assure that state and local interests are optimized. DLCDC recognizes the infrastructure assessment will inform, but will not bind, future land use decisions of the cooperating jurisdictions.

Consultant Role

The Project will use consultant services to perform technical analysis related to the infrastructure assessment. The consultant is expected to provide an analysis of infrastructure capacity and upgrades needed to support densification.

Project Meeting Materials

Grantee shall prepare meeting agendas and summaries for each Inter-bureau Infrastructure Coordination Team meeting.

Project Schedule

The schedule identified in “Schedule, Products, and Budget” section of this Project Description will be observed. DLCD may require an amendment to this Agreement if the timeframes in the schedule are not satisfied. The Project End Date is May 31, 2025.

Expectations for All Written and Graphic Products

All reports and Products will be delivered to the DLCD Grant Manager according to the schedule provided in this Project Description.

All reports, studies, and other documents produced under the Project must bear the statement in Project Requirement 3, below.

Grantee and the consultant will provide all draft and final Products, including memos, reports, and maps produced by this Agreement in a digital media format. The term “digital media” means a compact disc, digital video disc, USB flash drive, e-mail, or FTP submittal authorized by DLCD.

SCHEDULE, PRODUCTS, AND BUDGET

Pre-Task Submittals

The contract in Project Requirement 6 in this Project Description and Budget will be submitted.

Pre-Task Timeline: By the date specified in the requirement.

Pre-task report budget: \$0

Task 1: Land Use Growth Scenarios

BPS staff, in consultation with other City bureaus, will develop three high-level growth scenarios to estimate the number and distribution of new residential units for three growth scenarios:

1. Base Case – based on the current Buildable Land Inventory and Growth Allocation
2. Medium Scenario (go up) – based on a higher-density/capacity utilization of the existing zoning map.
3. High Scenario (go up and out) – based on an expansion of mixed-use and multi-dwelling zoning to create wider 2-3 block deep corridors of higher-density development within the project area.

The Growth Scenarios Report will include a description of the methodological assumptions built into each case/scenario.

Task 1 Products: Growth scenarios report, Inter-bureau Infrastructure Coordination Team meeting summaries/minutes

Task 1 timeline: January 1, 2024 to June 30, 2024

Task 1 budget: \$0 (city staff time in-kind)

Task 2: Infrastructure Assessment

BPS will retain a consultant to:

- Conduct impact analysis for infrastructure systems (transportation system, sewer system, stormwater conveyance system, water distribution system) based on high-level growth scenarios,
- Evaluate high-level infrastructure system conditions, capacity and constraints and identify investments needed to accommodate modeled growth,
- Develop recommendations for priority areas for future area planning, and
- Outline strategic approaches to accommodating growth based on the cost effectiveness of service provision, system improvements and capacity expansion.

Through an iterative and collaborative process, BPS will convene the City’s Multi-Bureau Infrastructure Coordination Team for reoccurring work sessions to review preliminary analysis and results.

The report will describe methodology and reference basis (facilities plan documents, etc.) for the impact analysis. The reports will include the following:

- Existing system conditions and capacity evaluation
- Constraints identified with each growth scenario
- Description of roles each city bureau played in this analysis

Task 2 Products: Existing Conditions Report (BPS) and Infrastructure Assessment Report (Consultant)

The results will be an action plan on how to proceed with increasing residential capacity (zoning map changes) that is coordinated with infrastructure investment.

The Action Plan will include a description of key decision-making points and metrics used to determine the recommended actions, as well as:

- Identification of areas that can be upzoned in the near term, where infrastructure capacity is in place
- Recommended prioritization of capital improvement projects identified in the infrastructure assessment
- High level cost estimates of necessary infrastructure upgrade projects
- Identification of potential funding sources for infrastructure upgrade projects

The budget for this task covers a portion of the cost of a staff position at the Bureau of Planning and Sustainability that will coordinate the inter-bureau team.
