**Subject:** Title 11 amendments

Unfortunately I am out of town during this hearing but I want to write to state that developers should not receive any concessions to make it easier to remove trees - especially mature trees - for the sake of ease of developing land. These trees are essential for so many reasons - keeping air clean, cities cool and providing habitat for animals and other plants. It is a very short-sighted proposal to ease restrictions - in 10-20 years people will look back and regret these foolish and rash actions.

I love Portland and want to believe my city government will do the right thing and not capitulate to such pressure from developers. They will not have the greater good in mind - that is the job of our elected officials.

Thank you,  
Alicia Liang
