Draft Solid Waste Plan Goals

1. By 2015, reduce per capita waste generation below 2005 levels. (Buy less stuff and keep it longer!)

2. By 2015, recover 75% of all waste and promote highest value use of the recovered materials.

3. Minimize the impact of harmful wastes by targeting toxicity and reducing greenhouse gas emissions.

4. Promote sustainable practices within the solid waste and recycling system.
