27 Healthy Birth Weight Babies - Printable Version - Edit Content

Increase the percentage of healthy birth weight babies.

This indicator is likely to maintain its excellent trend: babies weighing more than 2,500 grams (5.5 pounds) have comprised around 94% of Multnomah County births since 1985. The drop in 2000 was likely due to a large spike in multiple births. Further intervention is needed only for highest risk populations.
