## 66 Air Quality - Printable Version - Edit Content

### Increase the number of days per year the community meets ambient air quality standards.

The Oregon Department of Environmental Quality computes the Air Pollution Index which is an easy way to assess ambient air quality. The index simplifies daily air quality data into one value which has a corresponding descriptor. Values described as 'good' and 'moderate' indicate that Ambient Air Quality Standards have been met. Air quality was described as 'unsafe for some groups' and/or 'unhealthy' for six days in 2006 and eight days in 2007.

Air Pollution Index for Portland-Vancouver Area

\*Unsafe for some groups + Unhealthy. Source = Oregon DEQ, AQ Data Summaries
