

Exhibit 1.1 Estimated Homeless Counts during a One-Year Period¹

Reporting Year: 10/1/2008 - 9/30/2009

Site: Portland-Gresham-Multnomah County CoC

	Persons in Families in Emergency Shelters	Persons in Families in Transitional Housing	Individuals in Emergency Shelters	Individuals in Transitional Housing	Estimated Total Number of Homeless Persons Across Reporting Categories*
Total Estimated Yearly Count²					
<i>Estimated Total Count for Period</i>	737	1,456	2,429	3,263	7,885
Point-in-Time Counts³					
<i>Estimated Total on an Average Night</i>	127	310	321	1,490	2,248
On a single night in...					
<i>October 2008</i>	133	315	296	1,459	2,203
<i>January 2009</i>	133	324	321	1,453	2,231
<i>April 2009</i>	110	302	317	1,564	2,293
<i>July 2009</i>	125	310	315	1,484	2,234
Number of Families⁴					
<i>1 year count (October 1-September 30)</i>	194	454			
Point-in-Time Counts⁵					
<i>October 31, 2008</i>	37	111			
<i>January 30, 2009</i>	33	103			
<i>April 30, 2009</i>	26	95			
<i>July 30, 2009</i>	29	97			
Estimated Utilization and Turnover Rates					
<i>Estimated Average Utilization Rate⁶</i>	100%	99%	105%	97%	
<i>Turnover Rate⁷</i>	5.80	4.67	8.00	2.26	
Estimated Counts by Household Type⁸					
<i>Individual adult male</i>			1,654	1,422	
<i>Individual adult female</i>			386	1,603	
<i>Adult in family, with child(ren)</i>	285	581			
<i>Children in families, with adults</i>	448	875			
<i>Households with only adults</i>			147	161	
<i>Households with only children</i>			12	34	
<i>Unaccompanied youth</i>			231	43	
<i>Missing this information</i>	5	0	0	0	

Exhibit 1.2 Detailed Derivation of Estimated Homeless Count¹

Reporting Year: 10/1/2008 - 9/30/2009

Site: Portland-Gresham-Multnomah County CoC

Step	Description	Source	Persons in Families in Emergency Shelters	Persons in Families in Transitional Housing	Individuals in Emergency Shelters	Individuals in Transitional Housing	
1	Unduplicated number of persons in participating in HMIS	HMIS data from providers that participate in HMIS	476	1,428	1,641	1,746	Persons
2	Number of emergency, year-round equivalent beds in HMIS (i.e., bed capacity for participating providers)	SuperNOFA Housing Inventory Chart	82	306	205	774	Beds
3	Average number of clients served per bed	Step 1 ÷ Step 2	5.80	4.67	8.00	2.26	Persons per Bed
4	Number of, year-round equivalent beds for not participating in HMIS (i.e., bed capacity for non-participating providers)	SuperNOFA Housing Inventory Chart	45	6	100	764	Beds
5	Estimated unduplicated number of persons served by providers that do not participate in HMIS	Step 3 x Step 4	261	28	800	1,723	Persons
6	Estimated number of persons served by participating and non-participating Providers. Note that this estimate double counts people who use participating and non-participating providers. This double count will be eliminated by the overlap adjustment below.	Step 1 + Step 5	737	1,456	2,441	3,469	Persons
7	Overlap factor is the square of [(Bed capacity for HMIS non-participating providers) / (Bed capacity for HMIS participating providers)]	(Step 4 ÷ Step 2) x (Step 4 ÷ Step 2)	0.30	0.00	0.24	0.97	is overlap factor
8	Number of persons who used more than one HMIS participating provider in the category	HMIS data from providers that participate in HMIS	0	52	51	212	Persons
9	Estimated number of persons in families that used both participating and non-participating providers	Step 7 x Step 8	0	0	12	207	is overlap (cross-over) adjustment
10	Total estimate of number persons that used either HMIS participating or non-participating Emergency Shelter	Step 6 – Step 9	737	1,456	2,429	3,263	Persons

Step	Description	Source	Persons in Families in Emergency Shelters	Persons in Families in Transitional Housing	Individuals in Emergency Shelters	Individuals in Transitional Housing	
11	Extrapolation Factor for non-participating providers: This is the factor applied to calculations that are based only on participating providers. It is used to estimate total number of persons served by participating and non-participating providers.	Step 10 ÷ Step 1	1.5488	1.0196	1.4804	1.8688	is the extrapolation factor for non-participating providers.
12	HMIS bed coverage rate	Step 2 ÷ (Step 2 + Step 4)	65%	98%	67%	50%	% of beds participating in the HMIS
13	Point-In-Time Extrapolation Factor. This is the factor applied to calculations that are based only on participating providers. It is used to estimate total number of persons served by participating and non-participating providers for values that report Point-in-time numbers. In contrast to the standard "Extrapolation Factor," the point-in-time Extrapolation fact does not include an adjustment for persons using multiple providers.	Step 6 ÷ Step 1	1.5488	1.0196	1.4878	1.9871	is the extrapolation factor for point-in-time counts.

¹ This reports provides estimates of the homeless individuals and persons in families in Emergency Shelter and transitional housing programs that participate in HMIS, as well as those that do not participate in HMIS. The estimate is an "extrapolated count" and is based on the assumption that beds located in programs that do not participate in HMIS are occupied at the same rate as beds located in HMIS-participating programs. The complete derivation of the total extrapolation factors is detailed in the next table.

Adding values across categories will double count persons who appeared in multiple types of programs.

The estimates do not include persons that are served by "victim service providers," including rape crisis centers, battered women's shelters, domestic violence transitional housing programs, and other programs whose primary mission is to provide services to victims of domestic violence, dating violence, sexual assault, or stalking.

² These results are generated by multiplying the HMIS data by the Extrapolation Factor (Step 11, in table 2.)

³ These values are generated by multiplying the HMIS data by the Point-In-Time Extrapolation Factor (Step 13, in table 2.)

⁴ These results are generated by multiplying the HMIS data by the Extrapolation Factor (Step 11, in table 2.)

⁵ These values are generated by multiplying the HMIS data by the Point-In-Time Extrapolation Factor (Step 13, in table 2.)

⁶ These results are generated by dividing the HMIS data on persons on an average night by the total beds in HMIS.

⁷ These results represent the average number of people who use each bed. It is generated by dividing the unduplicated count of persons recorded in HMIS, by the total number of beds in HMIS

⁸ These results are generated by multiplying the HMIS data by the Extrapolation Factor (Step 11, in table 2).

* This value is generated by multiplying the sum of the extrpolated number of persons in each category by an overlap factor, which accounts for persons who use multiple categories. This value is based on the overlap rates among participating programs and adjusted to account for possible overlap in non-participating providers. In this site the adjustment factor is: For the PIT. These values are generated by adding the point in time counts across categories. It is assumed that persons do not appear in multiple programs on the same night.
