2011-2016 Consolidated Plan

Housing Needs Assessment

This section provides data snapshots of the people who call Multnomah County home. Whenever possible, data is presented using the most recent 2010 U.S. Census data; however, other data, such as the Comprehensive Housing Affordability Strategy (CHAS) has not yet been updated. This section will be updated as new data becomes available.

INCLUDED:

- Population Characteristics of the Region
- Racial and Ethnicity Composition of the Region
- Housing Problems and Affordability for Low- and Moderate-Income Households
- Need for Housing Assistance by Race and Income Level
- Housing Needs for Low-Income Renters
- Housing Needs for People in Poverty
- Persons with Special Needs
- Homeless and Housing Inventory:
 - Continuum of Care Housing Activity Chart

Introduction

Housing Needs Assessment

Population Characteristics of the Region

POPULATION CHARACTERISTICS OF THE REGION

Population Growth Over Time

A recently published report, Population Dynamics of the Portland-Vancouver MSA, uses 2009 American Community Survey data and population estimates to trace population dynamics in Portland and its surrounding counties. Since the 1930s, the Portland-Vancouver metropolitan area has grown at least as fast as the United States, sometimes growing at double the speed of the nation. Oregon has long been a destination for migrants seeking opportunities and lifestyle amenities. The Portland region's growth rate has tended to mirror the state of Oregon's growth rate, partly because the region is home to a large share of the state population.

Effects of Recession on Population Growth

Population levels are sensitive to fluctuations in the economy. When the economy falters in the Portland-Vancouver MSA, there is a decrease in in-migration.

In the 1980s, the economic downturn affected the Oregon's population, which grew at a slower pace over the decade (7.9%) than the population of the USA as a whole (10.4%). However, the Portland-Vancouver region's population still grew faster than the overall US population during the 1980s.

Between 1990 and 2000, Oregon's population grew by 20% and the Portland-Vancouver region's population grew by 27%, which greatly outpaced US population growth of 13% over the same decade. During the 1990s, Clark and Washington counties experienced the greatest population increase among the regional counties, at 45% and 43% respectively, outpacing the region dramatically.

Clark and Washington counties continued to outpace the rest of the Portland-Vancouver region from 2000 to 2010. Since 2000, population growth has slowed in all of metropolitan Portland-Vancouver to 1.6% per year from 2000 to 2010, in contrast to the annualized rate of 2.1% per year from 1990 to 2000. One of the most important drivers of migration for adults is job availability. Thus, given the current economic climate in Oregon, population growth is unlikely to increase in the next census

Housing Needs Assessment

in 2010. Population will likely continue to grow, but at a lower rate per year. Official State of Oregon population forecasts reflect the new assumptions about a decline in migration due to lower employment.

Proportion of Population Growth by County

The share of population growth in the Portland-Vancouver MSA has shifted to different counties over the course of the region’s history. The population within the Portland-Vancouver MSA has spread from the urban core Chart 1 shows each county’s proportion of the total Portland-Vancouver regional population.

Source: Portland State Population Research Center, US Census Bureau, and Washington State Office of Financial Management in Population Dynamics of the Portland-Vancouver MSA.

A large percentage of the Portland-Vancouver MSA’s population has gradually shifted from Multnomah County to the outlying counties in the past 80 years. In 2008, only about 33% of the population lived in Multnomah County, down from 59% in 1960. Washington County has experienced dramatic growth over the past few decades, growing from 10% of the region’s population in 1960 to 24% of the population of the Portland-Vancouver MSA in 2008.

International and Domestic Migration

Housing Needs Assessment

Racial and Ethnic Composition of the Region

Some Portland-Vancouver counties have large numbers of people moving to the county from within the United States (“domestic migration”), while some counties have large numbers of people settling in the county after relocating from outside the USA (“international migration”). Multnomah County has traditionally lost population due to domestic migration—people moving from Multnomah to other counties—while it has made up for the loss by gaining international population. Washington County has large numbers of international migrants, while most of the people moving into Clackamas County were moving from somewhere in the USA.

RACIAL AND ETHNIC COMPOSITION OF THE REGION

Oregon is one of only a dozen states where the majority of its residents aren’t from there. Each year thousands of people move to Portland. The city’s entire population is growing, but Portland is still about 80 percent white, making it one of the most homogeneous metropolitan cities in the country.

However, the minority population has increased in every county in the Portland-Vancouver MSA in the last 30 years. The overall minority population increased from 360,000 people in 2000 to 507,202 people in 2008, an increase of 40.7%. This figure includes Asian Americans, Hawaiians and Pacific Islanders, Hispanics, African Americans, American Indians, and persons reporting two or more races. During this period, minority populations grew more than seven times faster than the overall population of the Portland-Vancouver MSA, which grew by 5.4% during the same period.

Housing Needs Assessment

Latinos are the fastest growing minority population in the Portland metropolitan area. Asian Americans are the second-largest minority population in the metropolitan area. The region receives immigrants from Vietnam, Hong Kong, Taiwan, Korea, Philippines, and Japan as well as Asian Americans who move here from other states. American Indians have remained a small but important minority in the Portland-Vancouver region. African Americans are the third largest minority population in the metropolitan area.

Housing Needs Assessment

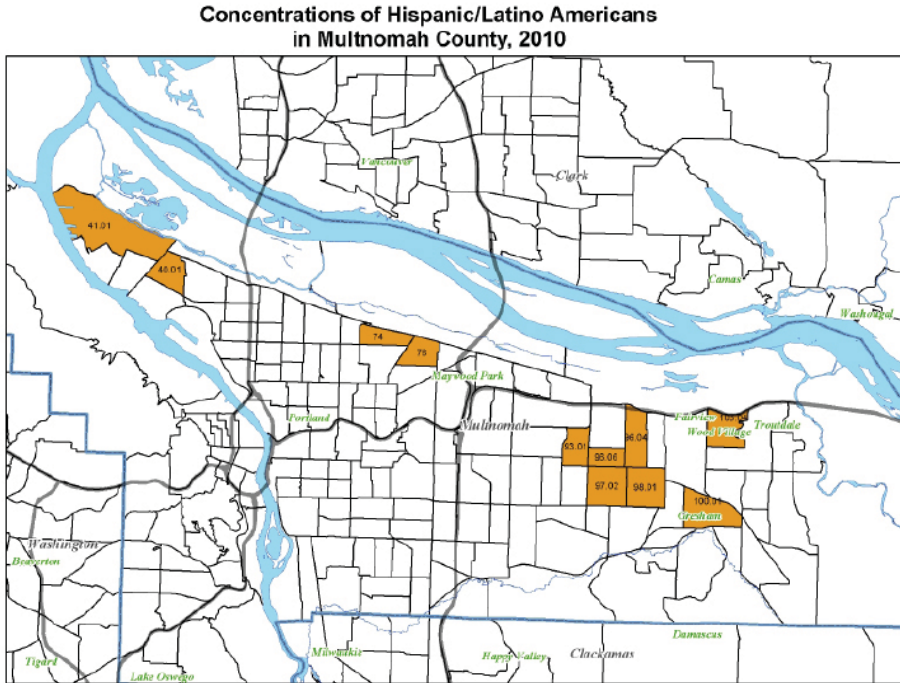

Map 5: African American Population Change by City 2000 - 2010

Concentrations of ethnic groups by census tracts have been depicted in the following maps 6 - 10. A concentration is defined as any tract having a greater ethnic population than twice the County average. There are fewer tracts with concentrations of African-Americans than in 2000, this could be attributed to the patterns of migration from Multnomah County to neighboring counties discussed earlier.

Housing Needs Assessment

HOUSING PROBLEMS FOR LOW- AND MODERATE-INCOME HOUSEHOLDS

The U.S. Department of Housing and Urban Development (HUD) periodically receives “custom tabulations” of Census data from the U.S. Census Bureau that are largely not available through standard Census products. These data, known as the “CHAS” data (Comprehensive Housing Affordability Strategy), demonstrate the extent of housing problems and housing needs, particularly for low income households. Table three breaks down the number and race of all households in Multnomah County within each income level, as well as the percentage of those with “housing problems” and excessive housing cost burden. One of the key factors behind homelessness is housing cost burden or “rent burden.”

Housing Needs Assessment

Forty-nine percent (49%) of Multnomah County renter households and 35% owner households are considered cost burdened, meaning they pay more than 30% of their gross income for rent/mortgage and utilities. Furthermore, 18% of Multnomah County households pay more than 50% of their gross income for rent/mortgage and utilities. Federal policy is that a household should not pay more than 30% of its gross income on housing costs. Households with housing costs that exceed this affordability standard frequently have to choose between paying rent/mortgage and purchasing other necessities like food and health care. Any crisis, from a medical emergency to job loss, can put a household with an extreme rent burden at risk of homelessness. As is evident in Table 3, households of color are disproportionately affected by cost burden, having a higher percentage of “housing problems” across racial and ethnic groups (chart 2).

Chart 2: Housing Problems by Race and County

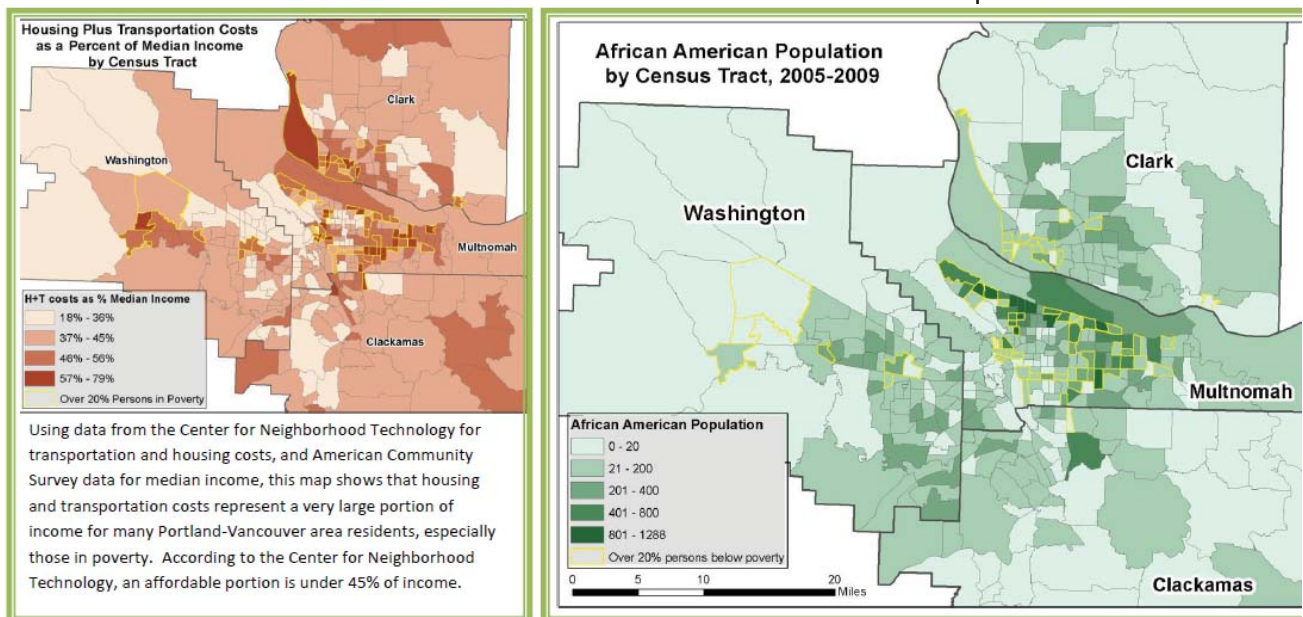

As discussed, housing costs factored as a percent of income has widely been utilized as a measure of affordability. Traditionally, a home is

Housing Needs Assessment

considered affordable when the costs consume no more than 30% of household income. The measure of Housing + Transportation costs has been developed as a more complete measure of affordability beyond the standard method of assessing only housing costs. By taking into account both the cost of housing as well as the cost of transportation associated with the location of the home, Housing + Transportation provides a more complete understanding of affordability. Dividing these costs by representative regional incomes illustrates the cost burden place on a typical household by Housing + Transportation expenses. While housing alone is traditionally deemed affordable when consuming no more than 30% of income, an affordable range for Housing + Transportation as the combined costs consuming no more than 45% of income. As was demonstrated with the cost burden data in chart two, households of color are disproportionately affected by Housing + Transportation costs in the Portland metropolitan region.

Current patterns of housing development create real and consequential inequities along lines of race/ethnicity, income, tenure, and disability. The availability of affordable housing determines how you can get around, whether you live near work, who is in your neighborhood, and what opportunities you can access.

Map 6: Housing Plus Transportation Costs

Housing Needs Assessment

Need for Housing Assistance by Race and Income Level

NEED FOR HOUSING ASSISTANCE BY RACE AND INCOME LEVEL

Federal regulations require an analysis to determine if any racial or ethnic group has disproportionately greater need, in comparison to the need of the population as a whole. See 24 CFR Section 91.205(b) (2). A “disproportionately greater need” exists when the percentage of people in an income category who are members of a particular racial or ethnic group is at least 10 percentage points higher than the percentage of people in the category as a whole.

HUD provides a special tabulation of 2009 American Community Survey data that includes cross tabulations by Housing Type, Income and Housing Problem. Race and ethnicity information was provided for African American, Asian American, Pacific Islander, Native American, and Hispanic households. All information is provided at the household level. The 2009 American Community Survey information available for Native American, Asian American, and Pacific Islander households is very limited, even though Multnomah County has significant Native American, Pacific Islander, and Asian American populations. Supplemental data on Native American households is described below. No comparable information is available for Pacific Islander and Asian American households.

An analysis of the HUD data shows that African Americans are disproportionately represented among households with incomes between 0-30% MFI. There were 18% more African American households in this category than there were households in this category as a whole. African American households did not show “disproportionately greater need” in any other income category. Asian American, Pacific Islander, Native American and Hispanic households did not show “disproportionately greater need” in any income category.

The HUD data indicates that 74% of Portland’s low-income households are white. Eight percent (8%) of Portland’s low-income households are African American.

Seventy-eight percent (78%) of Portland’s low-income African American population rents housing. Seventy-seven percent (77%) of Portland’s low-income Hispanic population rents housing. Sixty-one percent (61%) of Portland’s low-income white population rent housing.

Housing Needs Assessment

HOUSING NEEDS FOR LOW-INCOME RENTERS

Since 1998, the National Low Income Housing Coalition (NLIHC) has been issuing an annual report comparing wages in comparison to rents. This analysis uses the NLIHC methodology to gauge the ability of low-income households to rent at prevailing fair market rents (FMR) established by HUD, in the Portland-Vancouver metropolitan area:

- In the Portland-Vancouver Metropolitan Statistical Area (MSA) in 2010, the FMR for a two-bedroom unit was \$839.
- The generally accepted standard of affordability endorsed by HUD is that a unit is considered affordable if the cost of rent and utilities totals no more than 30 percent of the renter's income.
- The estimated renter household income is lower than the area median family income. In 2009, the estimated renter household income for the Portland-Vancouver MS was \$38,945 annually, compared with a median income for a family of four of \$71,200.
- Using the estimated renter household median income, the monthly wage for a renter household was \$3,245. An affordable unit should cost no more than 30 percent of that (\$974). Of all the low-income renter households in the Portland-Vancouver metropolitan area, 43% cannot afford the two-bedroom FMR.
- A worker earning the Oregon minimum wage (\$8.40 per hour) would have to work 77 hours per week in order to afford a two-bedroom unit at the area's FMR.
- The Housing Wage in the Portland-Vancouver MSA is \$16.13. This is the amount a full time (40 hours per week) worker must earn per hour in order to afford a two-bedroom unit at the area's FMR. This is 192% of the minimum wage (\$8.40 per hour).

In short, using the NLIHC analysis, we find an affordability gap for renters whose income is roughly 86% or less of the 2010 estimated renter median family income. These renters are unable to afford a two-bedroom apartment at the prevailing FMR of \$839.

Housing Needs for Low-Income Renters

Housing Needs Assessment

Tables 4 and 5 below are presented in the form used in the NLIHC Report.

Amount			Percent of 2010 MFI for a household of Four		
Zero Bedroom	One Bedroom	Two Bedroom	Zero Bedrooms	One Bedroom	Two Bedroom
\$25,040	\$29,040	\$33,560	35%	41%	47%

Housing Wage						Work Hours per Week to Afford a Unit If Person Earns Oregon Minimum Wage	
Hourly Wage Needed (40 hrs/wk)			As Percentage of Minimum Wage (OR= \$8.40)				
Zero Bedroom	One Bedroom	Two Bedroom	Zero Bedrooms	One Bedroom	Two Bedroom	One Bedroom FMR	Two Bedroom FMR
\$12.04	\$13.96	\$16.13	143%	166%	192%	66	77

Housing Needs for People in Poverty

HOUSING NEEDS FOR PEOPLE IN POVERTY: HIGH POVERTY POCKETS

An estimated 30 percent or more of the population lives at or below the federal poverty level in 20 metropolitan Portland census tracts, including some amid outlying suburbs, according to recently published U.S. Census Bureau data. The federal poverty level for a family of four is income of \$22,050 annually for all states, except Alaska and

Housing Needs Assessment

Hawaii, according to U.S. Department of Health and Human Services guidelines. The federal poverty rate for an individual is \$10,830 annually. The American Community Survey (ACS) population and housing data were collected by the U.S. Census Bureau between Jan. 1, 2005, and Dec. 31, 2009. The estimated poverty rate for the Portland metro area — which includes Washington, Multnomah, Yamhill, Clackamas and Columbia counties in Oregon and Clark and Skamania counties in Washington — was 11.7 percent, with a margin of error of plus or minus 0.3 percent. For these 20 high-poverty tracts, the margins of error ranged from 5 to 15 percentage points.

As discussed in the recent Portland State University (PSU) article *New Census Data Show Portland's High-poverty Pockets*, concentrations of poverty continue to be an issue in Portland and perhaps surprisingly, some of its surrounding cities: “several of the tracts are clustered in downtown Portland, as well as North and Northeast Portland neighborhoods with comparatively high minority populations. Perhaps less predictably, the cities of Forest Grove and McMinnville, as well as North Portland’s University Park neighborhood, include tracts with similarly high poverty rates. These tracts include concentrations of college students, who typically have low incomes.” The PSU article continues and describes the Tracts as follows:

Tracts 33.01 and 34.01, which overlay parts of Portland’s Humboldt and King neighborhoods, marked a notable concentration of poverty. More than a third of individuals within these tracts lived at or below the poverty line. Non-whites constituted about half of the population, including persons identifying as African-American, who represented about one third of the population of each tract; roughly half of the households in each tract were renters.

Tract 76, which is part of Northeast Portland’s Cully neighborhood, was another notable poverty pocket. More than 38 percent of individuals here lived at or below the federal poverty level. Nearly half of the tract’s residents were non-white; about 40 percent of the tract’s residents were renters. The data underscore that poverty is not just an urban problem. Indeed, more than a third of individuals lived at or below the poverty line in four census tracts clustered around Portland’s eastern border with Gresham. These tracts also had a comparatively high percentage of renters.

Housing Needs Assessment

Census tract 40.02 in North Portland's University Park neighborhood, which includes the University of Portland, also had a high poverty rate compared to other parts of the metropolitan area. Nearly 34 percent of individuals lived at or below the federal poverty level. The tract had slightly higher shares of white residents and homeowners than the metro area overall, but about 41 percent of its residents were college students.

In the City of Gresham, six census tracts showed areas with more than 20 percent of the individuals living at or below the poverty level with four of those tracts above 34 percent. The highest poverty pocket is Census Tract 96.06 in Rockwood where nearly 39 percent of the population is at or below the federal poverty level and the area is 34 percent Hispanic or Latino.

The neighboring Census Tract 96.04, also Rockwood, shows that 34.5 percent live at or below the poverty level and 32 percent is Latino or Hispanic.

Tract 93.01, also in Rockwood and East Portland shows 36 percent living at or below the federal poverty level with 27 percent Hispanic or Latino as well as a high concentration of Native Americans. Tract 97.02, also in Gresham and East Portland, shows a 24.3 percent concentration of poverty.

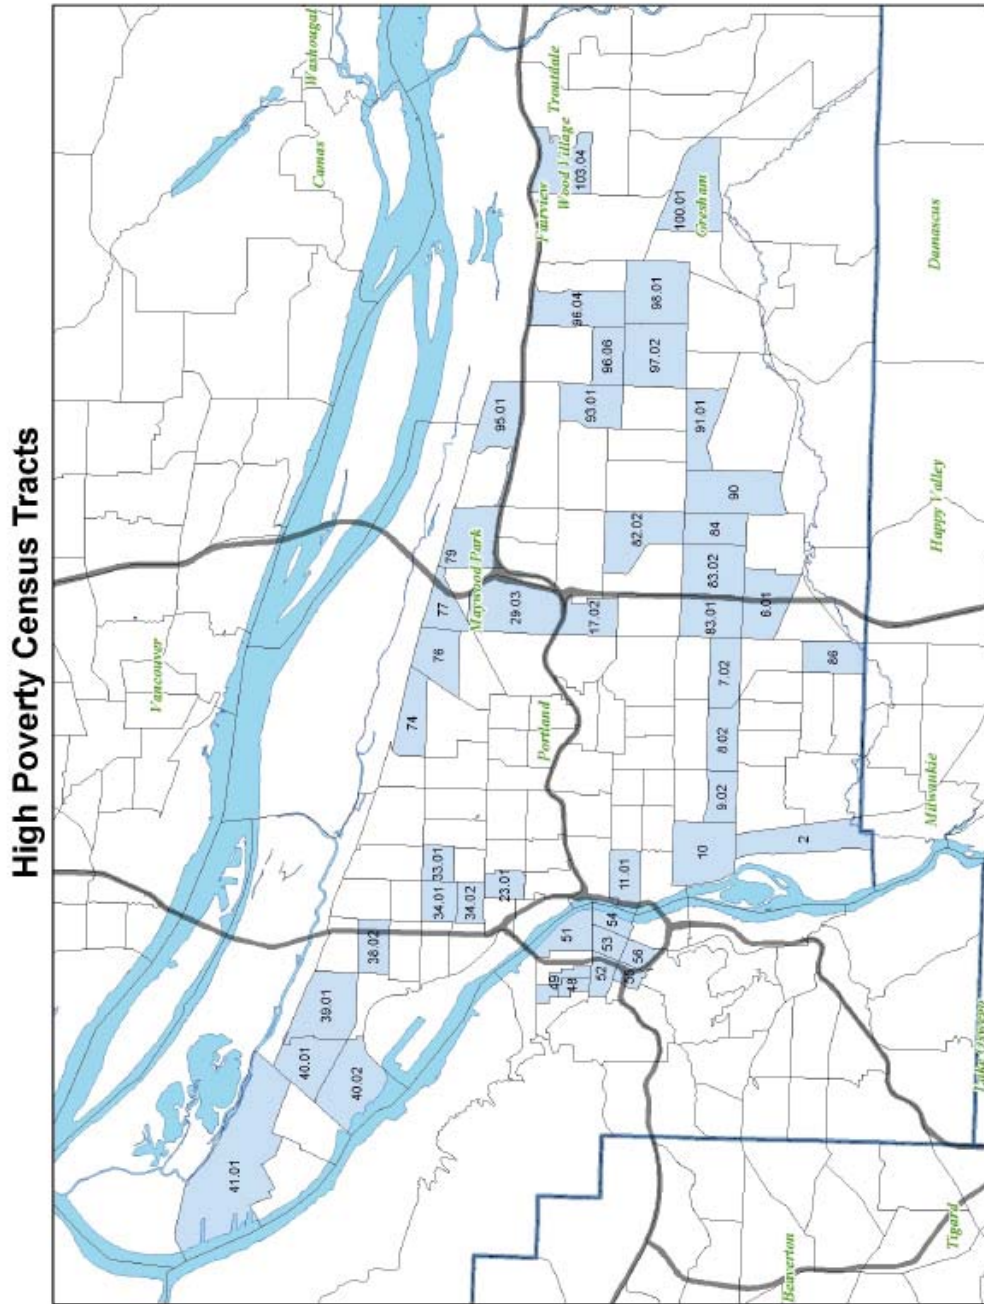

More than 34 percent of individuals of the tract's residents lived at or below the poverty rate in Tract 98.01. Also in this area, which includes both the Rockwood and Centennial Neighborhoods, 29 percent of the population is Hispanic or Latino.

Tract 97.02 shows a concentration of 24.3 percent poverty.

Tract 100.01 in the central business area, the Central City neighborhood, has approximately 22.5 percent of its residents living in poverty with 26 percent of the population Latino or Hispanic.

Housing Needs Assessment

Map 7: Multnomah County High Poverty Tracts

Source: 2005-2009 American Community Survey

Housing Needs Assessment

Persons with Special Needs

PERSONS WITH SPECIAL NEEDS

Many persons in each of the special needs categories, regardless of their specific disability, share certain characteristics. Many have permanent conditions that affect their self-care capacity and may limit their mobility. Large numbers are extremely low-income individuals. Due to poverty and disability, individuals without a strong support system and subsidized housing are extremely vulnerable to homelessness, and some are at risk of institutionalization. Many with special needs require support services to both access and maintain housing.

Number Of Persons With Disabilities

According to the 2005-2007 3-year American Community Survey, 14.3% (90,958) of the total population of Multnomah County are people who have a significant physical or mental disability. There are 39,935 people with only one disability and 50,711 people who have 2 or more disabilities. These disabilities fall in six categories:

• Sensory disability	22,113
• Physical disability	54,209
• Mental disability	39,485
• Disability makes it difficult to care for self	18,045
• Disability makes it difficult to go out alone	27,442
• Disability prevents person from working	33,432

(These amounts of people include those people with one and multiple disabilities.)

Poverty: Income And Housing Costs

Unless they have another source of income, most individuals with a disability rely on support from programs administered by the Social Security Administration, such as Supplemental Security Income (SSI) or Social Security Disability Insurance (SSDI). According to the Social Security demographic information, there are approximately 16,499 recipients in Multnomah County as of December 2008, an increase of 7.4% over 2005.

In 2009, the SSI benefit for a household of one is \$674 monthly

Housing Needs Assessment

(\$8,088 annually) or just over 17% MFI. The average SSDI benefit, based on previous earnings, is higher (\$10,944), but is still under 30% MFI for a household of one.

Under the HUD standard of affordability, housing and utilities together should cost no more than 30% of a household's income. Affordable rent for a person receiving SSI is approximately \$202 per month. Given that the 2009 fair market rent for a studio unit in the Portland-Vancouver Metropolitan Statistical Area (MSA) is \$626, a renter with a disability who is unable to secure a Section 8 voucher or other subsidized housing can expect to have to pay to over 90% of his or her income on housing.

Housing Challenges for Seniors in Multnomah County

Persons in Multnomah County living on Supplemental Security Income (SSI) live on a low fixed income. Data shows that the average monthly SSI benefit is far below the Fair Market Rent for a one-bedroom apartment in Multnomah County. Table 6 shows the difference in dollars between the benefit received and the market rent. This does not take into account additional costs such as utilities, transportation, food, and other necessities. This population is particularly vulnerable as the SSI program is designed to help the elderly, blind, and disabled.

Table 6: SSI Monthly Benefit Compared to One-Bedroom Fair Market Rent Cost, Multnomah County

	December 2007	December 2008	December 2009	December 2010
Average Annual Benefit¹	\$5,864	\$5,984	\$6,484	\$8,088
Average Monthly Benefit	\$489	\$498	\$540	\$674
Market Rate Rent – One Bedroom²	\$638	\$655	\$700	\$726
Difference	(\$149)	(\$157)	(\$160)	(\$52)

Housing Needs Assessment

Care Challenges

The number of people with physical limitations increases steadily with age. As the number of “old, old” seniors increases, the need for in-home or other services increases as well. Many seniors prefer to stay in their own home rather than moving to a licensed facility. The provision of supportive services, such as housekeeping or personal care, is funded by Medicaid or through Oregon Project Independence. The funding for these programs is at risk due to state budget shortfalls. The state may not be able to provide sufficient local “match” for federal Medicaid dollars.

In 2008, Multnomah County’s Aging and Disability Services (ADS) commissioned Portland State University (PSU) to produce a needs assessment of the target population served by ADS to assist in planning services for the future. The 2008 Community Needs Survey produced by PSU surveyed adults in Multnomah County who were at least 55 years of age and qualified as very-low-income. The survey explored the views of adults meeting the screening criteria on safety and security, formal and informal support, physical and mental health, nutrition, exercise and activities, sources of information used to find resources, employment and retirement, and volunteerism or civic engagement. Housing affordability was found to be a top concern, with 86% of renters and 68% of homeowners spending more than 30% of their income on housing. Other concerns the report listed are as follows:

- While the majority of adults 55 and over want to stay in their current residence as long as possible, 44% of those who had moved in the last five years had done so to reduce housing costs. Of those who had not moved in the last five years, 25% expect to move in the next five years to more affordable housing. Adults 55-64 were the most likely of all of those surveyed to say they might need to move to more affordable housing within the next five years.
- Finding affordable housing is a concern, especially among renters. Homeowners were more likely than renters to say they would be able to find affordable housing when needed (37% of homeowners versus 13% of renters).
- One-quarter (25%) of adults surveyed report needing repairs, changes, or modifications to remain in their home as they age.

Housing Needs Assessment

While 32% of adults surveyed said their home needed one or two repairs or changes, another 32% said their home needed five or more.

- A greater percentage of those 55-64 than in other age groups, female versus male adults, and white, non-Hispanic adults (compared to Hispanic, Asian, Native American or other ethnic minority adults), said their residences would need repairs or modifications.
- Surveyed adults said that, even if needed, the most costly repairs or modifications (e.g., structural items such as a new roof, accessible room additions, heating or cooling systems) were the least likely to be planned due to cost.

Programs

Consortium funds allocated for homeless services support the community's Continuum of Care for homeless adults and youth as well as the City and County's 10-year Plan to End Homelessness. CDBG-funded program activities focus primarily on the development and operation of homeless facilities along with providing associated services to low income and homeless populations. The City of Portland's CDBG funding is directed to housing-related information and referral services, fair housing services, transitional housing for mentally ill homeless adults, housing services for homeless seniors, as well as emergency shelter and services for homeless adults.

The Housing and Homeless Services Consolidated Plan goals include:

- To support the shelter and housing capacity recommended by the housing and service plan each homeless population and in support of the City and County 10-year Plan to End Homelessness.
- To provide adequate emergency basic shelter to meet the needs of homeless individuals, unaccompanied youths).
- To develop homeless facilities pursuant to adopted housing and service plans and to maintain existing low-income housing stock in the community.
- To reduce the number of at-risk adults, families and youth who become homeless in our community each year

Housing Needs Assessment

Services and Housing

Some people with disabilities need housing that also links supportive services, especially those suffering from mental health disabilities and seniors with cognitive decline. Anecdotal data from Disability Rights Oregon explains that with a shortage of accessible, affordable units that also offer supportive services, more people with mental health disabilities are either unnecessarily institutionalized in facilities, or they end up being discharged from those facilities into homelessness.

Multnomah County's 10-Year Plan to End Homelessness calls for 1,600 units of Permanent Supportive Housing (PSH) for chronically homeless single adults and 600 units of PSH for families with special needs by 2015.

Permanent Supportive Housing is defined as:

- Permanent, affordable housing with
- Comprehensive supportive services for
- People who are:
 - Chronically homeless with
 - Disabilities or other
 - Substantial barriers to housing stability

Permanent Supportive Housing (PSH) can range from housing with addiction services and mental health services, to regular case manager check-ins. The need of people living with disabilities or mental health illnesses vary; ideally, the range of PSH types should be flexible to address the varying needs of those accessing PSH units. This effort will need on-going collaboration and inter-jurisdictional partnerships to ensure streamlined services and funding.

Programs

There are several initiatives in the Portland area aimed at assisting low-income people and/or people with special needs.

- Low-Income Elderly - Unlimited Choices makes physical accessibility improvements for elderly and people with a disability so they can remain in their homes. All three jurisdictions help fund these modifications.
- Adults with Physical Disabilities - Adults with physical disabilities may qualify for permanent supportive housing. Both the Ten-Year

Housing Needs Assessment

Plan to End Homelessness and the recommendations issued by the HCDC Special Needs Committee address the needs of this group. The continuing State budget woes threaten income programs, services and housing for this population.

- Adults with Severe and Persistent Mental Illness - Adults with severe and persistent mental illness may qualify for permanent supportive housing. Both the HCDC SNC and the Ten-Year Plan to End Homelessness address the needs of this group. The continuing State budget woes threaten income programs, services and housing for this population.
- Adults with Developmental Disabilities - Adults with developmental disabilities may qualify for permanent supportive housing. Both the Ten-Year Plan to End Homelessness and the recommendations issued by the HCDC Special Needs Committee address the needs of this group. The continuing State budget woes threaten income programs, services and housing for this population.
- Adults with Addiction Disorders - Adults with addiction disorders may qualify for permanent supportive housing. Both the Ten-Year Plan to End Homelessness and the recommendations issued by the HCDC Special Needs Committee address the needs of this group. The continuing State budget woes threaten income programs, services and housing for this population.
- At-Risk-Youth - The Ten-Year Plan to End Homelessness addresses some of the needs of this group.
- Offenders - The City's NOFA included a preference for permanent supportive housing. Members of this population who have physical disabilities, development disabilities, SPMI, or addiction disorders may qualify for permanent supportive housing. Both the Ten-Year Plan to End Homelessness and the recommendations issued by the HCDC Special Needs Committee address the needs of this group. The continuing State budget woes threaten income, programs, services and housing for this population.

A summary of the programs and services targeted to low-income, homeless, and special needs populations is provided in Table 7.

Housing Needs Assessment

Table 6: CDBG Funded Homeless Facilities and Services

Agency	Program	Facility/Service
Multnomah County; Subcontractor: Luke-Dorf	Bridgeview Transitional Housing	48 SRO transitional housing units for homeless and severely mentally ill adults. Individuals can stay up to 24 months, and receive case management, mental health services, residential support, financial support and permanent housing assistance.
Northwest Pilot Project	Senior Housing Program	Services for homeless and at-risk seniors (age 55 and older) to obtain and maintain affordable, permanent rental housing. Services include housing assessments, placements, retention services and referrals that are customized to the needs of each household.
Transition Projects, Inc.	Clark Center	A 90-bed emergency shelter facility for men experiencing homelessness. Guests can stay up to 16 weeks, in a safe, low-barrier, supportive environment. Clients gain access to case management, housing assistance and referrals to support services.
Transition Projects, Inc.	Community Service Center	An access center that provides individuals with basic services, emergency shelter intake, access to supportive service referrals, housing placement, financial assistance and housing retention support.
Transition Projects, Inc.	Glisan Street Shelter	90-bed emergency shelter for men experiencing homelessness. Guests can stay up to 16 weeks, in a safe, low-barrier, supportive environment. Clients gain access to case management, housing assistance and referrals to support services.

OR-501
COC_REG_2010_019717

3A. Continuum of Care (CoC) Strategic Planning Objectives

Objective 1: Create new permanent housing beds for chronically homeless persons.

Instructions:

Ending chronic homelessness continues to be a HUD priority. CoCs can do this by creating new permanent housing beds that are specifically designated for this population. In the 2010 NOFA, a chronically homeless person is defined as an unaccompanied homeless individual with a disabling condition or a family with at least one adult member who has a disabling condition who has either been continuously homeless for at least a year OR has had at least four episodes of homelessness in the past three (3) years.

On this section, CoCs are to describe their short-term and long-term plans for creating new permanent housing beds for chronically homeless persons that meet the definition in the 2010 CoC NOFA. In addition, CoCs will indicate the current number of permanent housing beds designated for chronically homeless persons. This number should match the number of beds reported in the 2010 Housing Inventory Count (HIC) and entered onto the Homeless Data Exchange (HDX). CoCs will then enter number of permanent housing beds they expect to have in place in 12-months, 5-years, and 10-years. These future estimates should be based on the definition of chronically homeless in the 2010 CoC NOFA.

For additional instructions, refer to the 'Exhibit 1 Detailed Instructions' which can be accessed on the left-hand menu bar.

Describe the CoCs short-term (12-month) plan to create new permanent housing beds for persons that meet HUD's definition of chronically homeless (limit 1000 characters).

The City, County, and the Housing Authority collaborate extensively with community stakeholders on an ambitious affordable housing agenda, including units set aside for chronically homeless persons. The 10-Year Plan goal to create 1,600 new permanent supportive housing units for chronically homeless individuals is also included in the community's Consolidated Plan. The City Council and County Commission endorsed this goal and committed staff resources to achieve it. Hundreds of units (40% of goal) have opened or are in the multi-year development process. Within the next twelve months, at least two new projects will come online, adding approximately 150 new units of PSH for chronically homeless individuals.

Describe the CoCs long-term (10-year) plan to create new permanent housing beds for persons that meet HUD's definition of chronically homeless (limit 1000 characters).

Homeless and Housing Inventory

Applicant: Portland/Gresham/Multnomah County CoC
Project: OR-501 CoC Registration 2010

OR-501
COC_REG_2010_019717

The City, County, and Housing Authority of Portland will continue to collaborate extensively with community stakeholders on the affordable housing agenda, including units specifically set aside for chronically homeless persons. The City will continue to staff the work of the CoC planning group, including convening stakeholders when permanent supportive housing (PSH) funding opportunities are announced.

Hundreds of PSH units for chronically homeless persons have already opened or are in the multi-year development process. A signature project, the City's Resource Access Center, opens in 7 months and will include 130 PSH units devoted 100% for chronically homeless. If chronic homelessness is not ended by 2015, the City, County and Housing Authority will work to increase the supply of permanent supportive housing through partnerships with the Veterans Administration, County Health Department, State Offices of Housing & Human Services and other public and private entities.

How many permanent housing beds do you currently have in place for chronically homeless persons?	563
In 12-months, how many permanent housing beds designated for the chronically homeless do you plan to have in place and available for occupancy?	639
In 5-years, how many permanent housing beds designated for the chronically homeless do you plan to have in place and available for occupancy?	1,600
In 10-years, how many permanent housing beds designated for the chronically homeless do you plan to have in place and available for occupancy?	2,000

OR-501
COC_REG_2010_019717

3A. Continuum of Care (CoC) Strategic Planning Objectives

Objective 2: Increase the percentage of participants remaining in CoC funded permanent housing projects for at least six months to 77 percent or more.

Instructions:

Increasing the self-sufficiency and stability of permanent housing program participants is an important outcome measurement of HUD's homeless assistance programs. Each SHP-PH and S+C project is expected to report the percentage of participants remaining in permanent housing for more than six months on its Annual Progress Report (APR). CoCs then use this data from all of its permanent housing projects to report on the overall CoC performance on form 4C. Continuum of Care (CoC) Housing Performance.

On this section, CoCs are to describe short-term and long-term plans for increasing the percentage of participants remaining in all of its CoC funded permanent housing projects (SHP-PH or S+C) to at least 77 percent. In addition, CoCs will indicate the current percentage of participants remaining in these projects, as indicated on form 4C, as well as the expected percentage in 12-months, 5-years, and 10-years. CoCs that do not have any CoC funded permanent housing projects (SHP-PH or S+C) for which an APR was required, should indicate this in both of the narratives below and enter 0 in the first numeric field below.

For additional instructions, refer to the [Exhibit 1 Detailed Instructions](#) which can be accessed on the left-hand menu bar.

Describe the CoCs short-term (12-month) plan to increase the percentage of participants remaining in CoC funded permanent housing projects for at least six months to 77 percent or higher (limit 1000 characters).

The CoC emphasizes housing retention in the 10-Year Plan, including the use of shared retention outcomes across programs. Targeted investment of flexible local and federal short-term rent assistance funds will continue to improve CoC-wide outcomes. For example, the local Short-Term Rent Assistance program has an ambitious goal of 80% retention at 6 months after the end of rent assistance. Community nonprofits commonly leverage other private and public resources to provide supportive services to ensure that this occurs. With HUD SHP-funded programs, providers generally offer case management, resident services, and direct client assistance funds. Homeless youth providers continue to leverage a recently-awarded SAMHSA grant to provide supportive services for homeless youth placed in permanent housing. The Evaluation Committee will continue to evaluate obstacles to achieving retention goals and take active steps with poorly performing projects to develop improved retention rates.

Describe the CoCs long-term (10-year) plan to increase the percentage of participants remaining in CoC funded permanent housing for at least six months to 77 percent or higher (limit 1000 characters).

Homeless and Housing Inventory

Applicant: Portland/Gresham/Multnomah County CoC
Project: OR-501 CoC Registration 2010

OR-501
COC_REG_2010_019717

The CoC will continue working toward exceeding this objective by continuing the strategies listed above -- including 10-Year Plan and STRA annual goals on permanent housing retention. If housing retention goals are not improved, the STRA funders will evaluate the obstacles and work with providers to overcome them. The Coordinating Committee to End Homelessness will continue sharing best practices at monthly meetings and offer trainings to improve housing retention, including presentations by agencies with high retention rates.

The CoC's ability to continue to meet or exceed its target of an 80% retention goal within 10 years will partly depend on how quickly the economy and job market stabilize. Service providers report that maintaining current retention levels, let alone improving them, has become increasingly challenging as the people they have housed struggle to secure and retain employment along with the services and supports they need to enable them to remain stable.

What is the current percentage of participants remaining in CoC funded permanent housing projects for at least six months? 89

In 12-months, what percentage of participants will have remained in CoC funded permanent housing projects for at least six months? 80

In 5-years, what percentage of participants will have remained in CoC funded permanent housing projects for at least six months? 80

In 10-years, what percentage of participants will have remained in CoC funded permanent housing projects for at least six months? 80

Homeless and Housing Inventory

Applicant: Portland/Gresham/Multnomah County CoC
Project: OR-501 CoC Registration 2010

OR-501
COC_REG_2010_019717

3A. Continuum of Care (CoC) Strategic Planning Objectives

Objective 3: Increase the percentage of participants in CoC funded transitional housing that move into permanent housing to 65 percent or more.

Instructions:

The ultimate objective of transitional housing is to help homeless families and individuals obtain permanent housing and self-sufficiency. Each SHP-TH project is expected to report the percentage of participants moving to permanent housing on its Annual Progress Report (APR). CoCs then use this data from all of its CoC funded transitional housing projects to report on the overall CoC performance on form 4C. Continuum of Care (CoC) Housing Performance.

On this section, CoCs are to describe short-term and long-term plans for increasing the percentage of transitional housing participants moving from its SHP-TH projects into permanent housing to at least 65 percent. In addition, CoCs will indicate the current percentage of SHP-TH project participants moving into permanent housing as indicated on form 4C, as well as the expected percentage in 12-months, 5-years, and 10-years. CoCs that do not have any CoC funded transitional housing projects (SHP-TH) for which an APR was required, should indicate this in both of the narratives below and enter 0 in the first numeric field below.

For additional instructions, refer to the [Exhibit 1 Detailed Instructions](#) which can be accessed on the left-hand menu bar.

Describe the CoCs short-term (12-month) plan to increase the percentage of participants in CoC funded transitional housing projects that move to permanent housing to 65 percent or more (limit 1000 characters).

The extent to which Portland exceeded this threshold is due to the focus on developing affordable housing. Furthermore, approximately 35% of the SHP-funded transitional housing units allow households to "transition in place." Programs assist individuals and families in finding private market, scattered-site units and provide up to two years of assistance to support housing retention. At the end of that time, households either transition to a permanent subsidy or have increased household income to continue paying rent on their own.

The CoC's success at meeting this goal is dependent upon available permanent housing and employment. The City, County, and Housing Authority will continue to collaborate with community stakeholders on affordable housing goals, including units set aside for homeless households. If the percentage begins to decrease over time, the CoC will evaluate causes and take steps to correct it.

Describe the CoCs long-term (10-year) plan to increase the percentage of participants in CoC funded transitional housing projects that move to permanent housing to 65 percent or more (limit 1000 characters).

Homeless and Housing Inventory

Applicant: Portland/Gresham/Multnomah County CoC

OR-501

Project: OR-501 CoC Registration 2010

COC_REG_2010_019717

The McKinney Evaluation Committee will continue to review Annual Progress Reports to ensure that all renewing projects meet or exceed HUD's national objectives. If projects are below this threshold, the committee will meet with key project staff to determine the obstacles and strategize solutions. If the project is not making sincere efforts to improve outcomes, the committee may determine to recommend reassignment of SHP funds to another provider that can meet the threshold. As part of the regional 10-Year Plan, the CoC will continue activities to increase employment and other income opportunities for homeless persons and to develop permanent supportive and affordable housing units throughout the region.

- What is the current percentage of participants in CoC funded transitional housing projects will have moved to permanent housing?** 73
- In 12-months, what percentage of participants in CoC funded transitional housing projects will have moved to permanent housing?** 73
- In 5-years, what percentage of participants in CoC funded transitional housing projects will have moved to permanent housing?** 75
- In 10-years, what percentage of participants in CoC funded transitional housing projects will have moved to permanent housing?** 77

OR-501
COC_REG_2010_019717

3A. Continuum of Care (CoC) Strategic Planning Objectives

Objective 4: Increase percentage of participants in all CoC funded projects that are employed at program exit to 20 percent or more.

Instructions:

Employment is a critical step for homeless persons to achieve greater self-sufficiency, which represents an important outcome that is reflected both in participants' lives and the health of the community. Each CoC funded project (excluding HMIS dedicated projects only) is expected to report the percentage of participants employed at exit on its Annual Progress Report (APR). CoCs then use this data from all of its non-HMIS projects to report on the overall CoC performance on form 4D. Continuum of Care (CoC) Enrollment in Mainstream Programs and Employment Information.

On this section, CoCs are to describe short-term and long-term plans for increasing the percentage of all CoC funded program participants that are employed at exit to at least 20 percent. In addition, CoCs will indicate the current percentage of project participants that are employed at exit, as reported on 4D, as well as the expected percentage in 12-months, 5-years, and 10-years. CoCs that do not have any CoC funded non-HMIS projects (SHP-PH, SHP-TH, SHP-SH, SHP-SSO, or S+C TRA/SRA/PRA/SRO) which an APR was required, should indicate this in both of the narratives below and enter 0 in the first numeric field below.

For additional instructions, refer to the [Exhibit 1 Detailed Instructions](#) which can be accessed on the left-hand menu bar.

Describe the CoCs short-term (12-month) plan to increase the percentage of participants in all CoC funded projects that are employed at program exit to 20 percent or more (limit 1000 characters).

Portland's 10-Year Plan includes goals regarding increasing economic opportunity for homeless persons. In recent years, the CoC has set specific numeric goals on numbers of homeless persons to receive job training, as well as numbers of homeless persons employed. One SHP project, Central City Concern's Employment Recovery Project, focuses on connecting adults with jobs at program exit. The Portland Development Commission's Economic Opportunity Initiative increases job training and placement, including supported employment programs. Our CoC will work to maintain funding for these successful programs.

In the next year, the Coordinating Committee to End Homelessness plans to convene a workgroup focused on supported employment and job placement programming.

Describe the CoCs long-term (10-year) plan to increase the percentage of participants in all CoC funded projects that are employed at program exit to 20 percent or more (limit 1000 characters).

Homeless and Housing Inventory

OR-501

Project: OR-501 CoC Registration 2010

COC_REG_2010_019717

Oregon is currently in the top five in the nation in unemployment. Projections are that the state will not experience job growth until about 2012. Therefore, the job market will be tighter than ever. People with special needs or with inconsistent employment will continue to be especially challenged. In this context, the work of PDC's Economic Opportunity Initiative will be increasingly important. This initiative is integrated into the work of the City's broader economic development commission, ensuring that the focus on employment opportunities for homeless individuals will be reflected in the broader economic development agenda.

The CoC is well aware of these challenges and will continue to endorse Portland's 10-Year Plan goals regarding economic opportunity. The CoC will continue to support existing successful employment programs and work to increase capacity not just for recently employed persons, but especially for those who need supported employment opportunities.

- What is the current percentage of participants in all CoC funded projects that are employed at program exit?** 23
- In 12-months, what percentage of participants in all CoC funded projects will be employed at program exit?** 23
- In 5-years, what percentage of participants in all CoC funded projects will be employed at program exit?** 24

COC_REG_2010_019717

3A. Continuum of Care (CoC) Strategic Planning Objectives

Objective 5: Decrease the number of homeless households with children.

Instructions:

Ending homelessness among households with children, particularly for those households living on the streets or other places not meant for human habitation, is an important HUD priority. CoCs can accomplish this goal by creating new beds and/or providing additional supportive services for this population.

On this section, CoCs are to describe short-term and long-term plans for decreasing the number of homeless households with children, particularly those households that are living on the streets or other places not meant for human habitation. In addition, CoCs will indicate the current total number of households with children that was reported on their most recent point-in-time count. CoCs will also enter the total number of homeless households with children that they expect to be able to report in 12-months, 5-years, and 10-years.

For additional instructions, refer to the [Exhibit 1 Detailed Instructions](#), which can be accessed on the left-hand menu bar.

Describe the CoCs short-term (12-month) plan to decrease the number of homeless households with children. (limit 1000 characters)

Over the past several years, the CoC began several initiatives to strengthen our ability to reduce homelessness among households with children. Despite these initiatives, family homelessness still increased over the past two years due to the economic recession -- a pattern experienced by communities across the country. In the next 12 months we will continue to intensify our efforts by: using HPRP funds to double the capacity of the Short Term Rent Assistance program, which prevents or ends homelessness of thousands of families each year; continuing a HUD-funded Rapid Re-Housing for Families Demonstration Program to fund leasing and services for at least 40 families with moderate barriers to housing stability; continuing the successful School Stabilization Fund to assure housing and school stability for homeless families; and continuing the Bridges to Housing program, which provides housing and services to 130 families with multiple barriers to housing placement and retention.

Describe the CoCs long-term (10-year) plan to decrease the number of homeless households with children. (limit 1000 characters)

Homeless and Housing Inventory

Applicant: Portland/Gresham/Multnomah County CoC
Project: OR-501 CoC Registration 2010

OR-501
COC_REG_2010_019717

Two rapid re-housing programs -- 2008's SHP demonstration program as well as HPRP -- will help to stem the tide of rising family homelessness. We hope to make the Rapid Re-Housing demonstration program permanent through renewable funding.

The community's 10-Year Plan includes a goal to create 600 new PSH units for homeless families with special needs, including 350 units via new construction or acquisition/rehab and 250 units through rent and operating subsidies. The creation of this new PSH for families will significantly reduce the number of homeless families by 2015.

The City, County, and Housing Authority will continue to work together with other partners to increase the supply of permanent housing for families, including PSH, through partnerships with the VA, County Health Department, State and more. We expect these efforts to align with increased federal resources and system alignment anticipated in the new Federal Strategic Plan to End Homelessness.

What is the current total number of homeless households with children, as reported on the most recent point-in-time count? 398

In 12-months, what will be the total number of homeless households with children? 388

In 5-years, what will be the total number of homeless households with children? 200

In 10-years, what will be the total number of homeless households with children? 0

Housing Market Analysis

THE ECONOMIC CONTEXT

The great recession that began in the late 2000's was felt most acutely here in Oregon. A recent report by the Oregon Employment Department "Why Oregon Trails the Nation: An Analysis of Per Capita Personal Income," found that in the past decade, the state's inflation-adjusted PCPI grew by 7 % compared to 12 % for the nation. The report also found that the PCPI in the state's metropolitan areas is far below the average for all metropolitan areas in the nation. In contrast, the PCPI in Oregon's non-metropolitan areas is similar to non-metropolitan areas across the nation.

A second report by the Brookings Institute and the London School of Economics studied 150 major metropolitan-area economies around the world. The report found that the recession has hit Portland harder than just about anywhere else in the world. It concluded that Portland fell from a pre-recession economic rating of 45th to 139th in 2009 and 102nd in 2010. The study said one reason for the dramatic fall was an over-reliance on the residential real estate industry that was especially hard hit by the collapse of the housing market.

The Oregon Employment Department cites several other reasons the state's PCPI lags so far behind the rest of the nation. They include:

- Lower industry wages
- Lower earnings by proprietors
- A fast-growing population
- Lower wages in high-paying occupational groups
- A net outflow of commuter wages
- Higher unemployment rate and lower employment-to-population ratio
- Shorter average workweek and more part-time work

The report concludes by saying there are no simple solutions that would quickly raise Oregon's PCPI to the national average. It is the

Economic Context

Housing Market Analysis

result of thousands of individual and business choices that are beyond government control.

In 2011, Oregon's economy is beginning to edge upward. In February, seasonally adjusted payroll employment grew by 9,800, Oregon's largest one-month gain since November 1996 when 10,600 jobs were added. Oregon's unemployment rate continued its consistent downward trend. Since reaching a high of 11.6 % in June 2009 it has trended downward, reaching 10.2 % in February.

In February, five of the ten major industries saw significant gains in employment. Construction added 1,200 jobs in February, when a loss of 800 is the normal seasonal movement. Most of the gains came from specialty trade contractors, which added 1,000. Building foundation and exterior contracts added 500 jobs, and have added 1,800 since February 2010. Building equipment contractors, such as electricians and plumbers, added 300 jobs. Construction employment appears to have turned the corner and headed upward. The past three months have each seen seasonally adjusted job gains. The sector bottomed at close to 67,000 jobs during June through November, but has since grown to 70,300 by February.

Impact of the Recession on Low-And-Moderate Income Oregonians

While Multnomah County, and particularly areas in the city of Portland, is one of the most affordable major West Coast areas, decreasing housing affordability has become the most significant housing issue in the metro area over the last decade. Cost burdens for both owners and renters have been increasing due to high housing prices, rising rents and relatively flat income growth. Although housing prices have fallen from their 2008 high, the average price of a home is still higher than a family with income at the median can afford.

RENTAL HOUSING AFFORDABILITY

While the supply of housing in Multnomah County has kept up with population growth, housing affordability is a major issue in the metropolitan area. Table 1 compares rents affordable to households at 30 %, 50 % and 80 % of median family income in the metropolitan area with the fair market rent for units.

Rental Housing Affordability

Housing Market Analysis

Table 1: Affordable Rental Housing in Portland Metropolitan Area

What is Affordable Housing in the Metro Area?
(Clackamas, Multnomah, Washington Counties)

Fair Market Rent: 1 BR/\$726, 2 BR/\$839, 3BR/\$1,222, 4 BR/\$1,467

Median Family Income	One Person Household			Four Person Household		
	Annual Income	Hourly Wage	Affordable Cost	Annual Income	Hourly Wage	Affordable Cost
30% MFI	\$14,950	\$7.18	\$373	\$21,350	\$10.26	\$555
	4/5 time fast food or child care worker			Home health aide, short order cook		
50% MFI	\$24,950	\$11.99	\$623	\$35,600	\$17.11	\$925
	Retail salesperson, taxi driver			Medical assistant, construction laborer		
80% MFI	\$39,900	\$19.18	\$997	\$56,950	\$27.38	\$1,481
	Dental assistant, credit analyst			911 dispatcher, drywall installer		
100% MFI	\$49,840	\$23.96	\$1,246	\$71,200	\$34.23	\$1,851
	Mental health counselor, Clergy member			Occupational therapist, software engineer		

Sources: 2010 HUD MFI levels, Oregon Employment Department wage information, 2010

Hourly wage assumes 40 hours/week, 52 weeks/year.

Affordable Cost is 30% of total income (rent or mortgage plus utilities), the standard of affordability used by HUD.

Home prices and rents tend to be higher in the urban core, and lower on the edges of the Metro area, Map 1 shows where a one-person household at 60% median income can afford to rent or buy.

Housing Market Analysis

Map 1: Housing Affordability for a One-Person Household at 60% Median Family Income

Households with lower incomes can no longer afford market rate units in neighborhoods that were affordable a decade ago, prompting many residents of close-in neighborhoods to move further out. Recently released census data suggests this dynamic has had a disproportionately large impact on households of color. Many of Portland's close in census tracts have become more white over the last ten years.

Housing Market Analysis

For sound policy development, it is important to understand the income distribution of the population. Table 2 gives the number of households and percentage of renter and homeowner households within identified income ranges for Multnomah County.

Table 2: Income Distribution of Households, Multnomah County, 2009

Household Income Range	Number of Renters	Percent of Total Renters	Number of Owners	Percent of Total Owners	Number of Households in Range	Percent of Total Households in Range
Below 30% MFI	34,515	29%	10,600	6%	45,115	16%
30.1% to 50% MFI	22,420	19%	12,625	8%	35,045	12%
50.1% to 80% MFI	28,355	24%	24,760	15%	53,115	19%
Above 80% MFI	34,555	29%	119,130	71%	153,685	54%
Total Households	119,845	100%	167,115	100%	286,960	100%

Source: US Department of Housing and Urban Development's Comprehensive Affordability Strategy (CHAS) data.

One way to measure the need for housing assistance is to compare the number of households that fall in a given income range, with the number of rental units affordable to households within that income range. Table 3 below was derived using HUD's Comprehensive Affordability Strategy (CHAS) data from the 2000 Census. While HUD expects to post new CHAS tabs reflecting more recent years of ACS data on housing supply, it has not yet made these data available to users. When these data are available, we will update this table.

Table 3 : Comparison of Renter Households and Availability of Units, Multnomah County Comprehensive Affordability Strategy (CHAS) data, 2000.				
Income Range	Renter Households (all sizes)	Affordable Renter Units Available	Percent of Need Met by Existing Stock	Surplus/ Shortage Units
Below 30% MFI	26,319	13,270	50%	-13,049
30.1% to 50% MFI	19,624	33,966	173%	14,342
50.1% to 80% MFI	28,604	58,699	205%	30,095
Above 80% MFI	40,050	10,394	26%	- 29,656
Total Households	114,597	116,329	102%	1,732

Housing Market Analysis

The local shortage of units affordable to very low-income and extremely low-income households is mirrored at the state level. The National Low Income Housing Coalition recently completed a statewide analysis of the deficit of affordable and available rental units using the 2009 American Community Survey PUMS housing file. The results of the analysis are shown in Table 4.

Table 4: Statewide Deficit of Affordable and Available Rental Units (2009)

Income Range	Deficit/Surplus of Affordable Rental Units	Deficit/Surplus of Affordable and Available Rental Units	Affordable and Available Rental Units Per 100 Households
Extremely Low Income	-65,541	-94,031	21
Very Low Income	-52,854	-114,659	48

Source: 2009 American Community Survey PUMS housing file

Housing Stock

HOUSING STOCK

The overall condition of housing stock in Multnomah County is measured through an analysis of physical stock characteristics and fitness characteristics. Evidence of the physical stock characteristics may be found in tax appraisal assessments of houses, demand for services to clean up derelict buildings, people's perceptions of the condition of housing in their neighborhood, and the age of the housing stock. Fitness housing stock is typically assessed by measuring overcrowding, affordability, and lack of complete plumbing facilities (although this criterion is rarely an issue in most cities today).

Although there is an older housing stock in Portland and Multnomah County, the overall quality tends to be adequate or better. On average, 65 percent of Portland residents and 75 percent of Gresham residents said that they thought the quality of housing in their neighborhood was good or very good.

The State of Oregon requires county tax assessors to rank the physical condition of single family homes. These classifications, ranging from 1-8, are meant to give an indication of the quality of the construction

Housing Market Analysis

of the house. Of the housing stock rates, most houses ranks as class 3 or better; that is, they meet the minimum code standards. Data were available on about 60 % of the single-family houses in Multnomah County. Out of that 60 %, close to one fifth of the single-family housing stock was not at acceptable building standards; about 70 % of all units rated were “Fair,” “Average” or “Good;” and about 3 % were classified as “Better or “Best.” These findings are within an acceptable level, given the age of the inner city housing stock. Older homes generally do not meet all of the standards of current building and housing codes.

Table 5: Condition of Single-Family Units: Multnomah County

Condition	Percent of Total
Classes 1 and 2 – Does not meet building codes	12.02%
Class 3 – Meets standard building codes – “Minimum”	19.18%
Class 4 – Meets standard building codes – “Fair”	14.58%
Class 5 – Meets standard building codes – “Average”	8.70%
Class 6 – Meets standard building codes – “Good”	4.60%
Class 7 – Meets standard building codes – “Better”	1.15%
Class 8 – Meets standard building codes – “Best”	.90%
Not Rated	38.87%
Total	100%

The age of housing stock is often used to gauge physical condition.

Table 6: Age of Housing Stock: Multnomah County

Year Constructed	Estimate	Percent of All Units	Margin of Error
Built 2005 or later	7,267	2%	+/-562
Built 2000 to 2004	22,915	7%	+/-876
Built 1990 to 1999	32,874	11%	+/-1,105
Built 1980 to 1989	23,117	7%	+/-1,008
Built 1970 to 1979	43,759	14%	+/-1,267
Built 1960 to 1969	31,246	10%	+/-979

Housing Market Analysis

Housing Condition

programs as an indicator of poorer quality housing, but this rule of thumb is not applicable in all locations.

HOUSING CONDITION

Overcrowding

A final measure of housing availability is the rate of overcrowding in existing housing units. "Overcrowding" is defined by the US Census Bureau as "a situation in which a housing unit is occupied by more than one person per room." According to the 2005-2009 American Community Survey, there are 7,435 (3%) households in Multnomah County meeting this definition. Home Forward has revised its occupancy standard from one person per bedroom to two people per bedroom. This is likely to increase the rate of overcrowding as defined by the Census Bureau. Although the Census is a useful benchmark, determining when a unit is, in fact, overcrowded requires additional information about the size of the rooms in relation to the age of occupants. A large room may be able to accommodate two adults or three children comfortably. In addition, we must be aware that not all cultures consider one person per room to be optimum.

Lead Based Paint

Lead hazards in homes are serious problems that affect every community. Indoor lead dust is a major cause of lead poisoning in children. The Oregon Health Division requires the reporting of children under the ages of 18 years of age with elevated blood levels over 10g/dl. Childhood lead screening has been conducted in Oregon on a regular basis since 1992. Multnomah County reports an average of 120 blood lead cases per year. "The Prevalence of Lead Dust Hazard Study" (2001) commissioned by the Multnomah County Health Department and the City of Portland showed that Multnomah County shares similar home lead hazards with other parts of the country. National studies commissioned by the Department of Housing and Urban Development estimate that 35% of all low-income housing contains lead hazards. In Multnomah County, this translates into an estimated 40,000 units with lead-based paint hazards that are occupied by low-income families.

The following map shows the percentage of extremely low income households with children living in housing built before 1950 at risk of lead poisoning. Maps One and Two are based on 2000 CHAS data. As the data is updated from HUD, we will update our analysis.

Housing Market Analysis

Map 2: Pre-1950 Housing by Tract

Percentage of Pre-1950 Housing by Tract, Multnomah County, Oregon

Note: The percentage is derived by dividing the number of pre-1950 units by total units in tract.
Low = between 0% and 28%; Medium = between 29% and 58%; High = between 59% and 97%.
Average = 41.5%.

Map 3: Kids Under 6 in Poverty by Tract

Housing Market Analysis

HOUSING AFFORDABILITY FOR HOMEOWNERS

Foreclosures

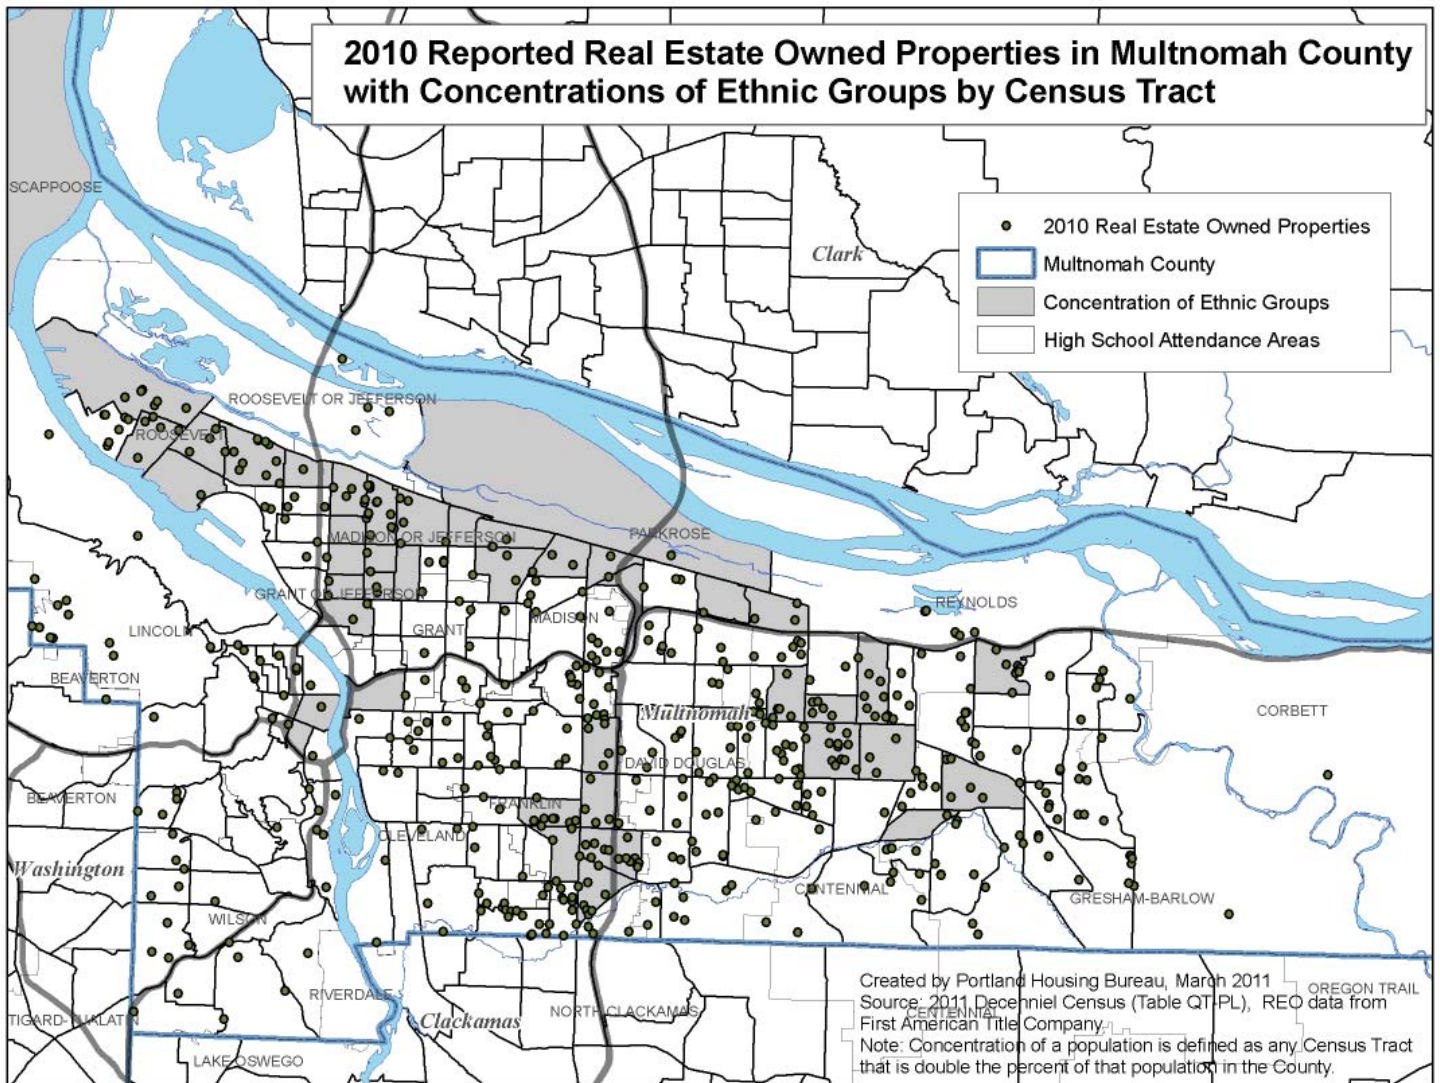

Although housing prices overall rose at a considerably faster rate than incomes in the last five years, many households were able to purchase homes through the use of nontraditional mortgage products, including subprime mortgages as well as adjustable rate, interest only and payment option loans. These homebuyers risked default if they were unable to make payments when their loans reset at higher rates, or were unable to sell their homes for as much as they owed on their loans. In the Portland area, as is in the rest of the country, housing price appreciation has reversed, the delinquency and foreclosure rates have risen and the inventory of unsold homes has increased dramatically. Of course, even those households that used traditional mortgages are in danger of losing their homes as a consequence of recession-related job loss.

Within the Portland metro area foreclosure activity varies considerably. Map 7 illustrates the reported real-estate owned properties in Multnomah County in 2010.

Housing Affordability for Homeowners

Housing Market Analysis

Map 7: Reported Real-Estate Owned Properties in Multnomah County

High Cost Loans

One of the underlying indicators of future foreclosure activity is the number of high cost loans that are made to area households. High cost loans have high interest rates and the assumption is that households with high cost loans (such as subprime loans) are at greater risk for foreclosure.

Housing Market Analysis

Housing Market Analysis

Assisted Housing Inventory & Services

ASSISTED HOUSING INVENTORY AND SERVICES

Subsidized Housing Supply

As cited in the Portland Plan, a 2007 draft of Metro's Regional Affordable Rental Housing Unit Inventory indicated that Portland had about 21,430 rental housing units developed with public subsidy that were affordable to households at or below 80 percent of area median income. Almost all of these units were regulated (92 percent, or about 19,780 units). The Inventory did not include ownership units, market-rate rental units, Section 8 rental voucher units, dorms, homeless shelters and transitional housing units. There are about 6,600 Section 8 rental voucher units in Portland. Some of these vouchers are used to rent housing in projects that receive other subsidies, so it is difficult to determine how much larger the total number of subsidized units would be if the Section 8 vouchers were added in. It should be noted that subsidized units only provide a small fraction of the City's supply of housing units affordable to low and moderate income households. The affordable housing supply includes many privately owned market-rate units, particularly in older buildings and manufactured home parks.

The largest source of funding for subsidized low-income housing in the County is the federal government. In addition to funding Home Forward, HUD provides funds for local housing programs through the Community Development Block Grant Program (CBDG), HOME and Housing for People with AIDS (HOPWA) programs. It also distributes Low Income Housing Tax Credits (LIHTC) through the State of Oregon Department of Housing and Community Services. The State of Oregon and the City of Portland also provide financial assistance for low income housing development out of General Fund, and require sponsors to execute affordability agreements as a condition of receiving assistance.

Home Forward

Home Forward (previously the Housing Authority of Portland) is the largest nonprofit provider, operator and developer of low-income housing in Multnomah County. Home Forward assists about 13,000 households with either housing or Section 8 vouchers. (Home Forward's service area includes all of Multnomah County.) As of March

Housing Market Analysis

2009, Home Forward had 4,960 housing units in the City of Portland, about 2,380 in its Public Housing portfolio and about 2,580 in its Affordable Housing portfolio. Home Forward has about 6,600 Section 8 rental housing vouchers in use. These vouchers are given to tenants to rent housing on the open market; Home Forward also distributes 1,630 project-based vouchers that are assigned to particular housing projects. Both the rental and project-based vouchers may be used in buildings that have other housing subsidies. While Home Forward may serve households with incomes up to 80 percent of the area median most households it serves are extremely low income. The average household income for a Public Housing tenant is \$10,219, and for a Section 8 voucher holder is \$10,306. Demand for public housing and Section 8 far exceeds the supply. Almost 7,000 households were on the waiting list for low income housing assistance in March, 2009, including about 3,665 for public housing and 3,261 for Section 8 vouchers. This is some indication of the pressing need.

Properties at Risk

The following properties have Project-based Section 8 contracts that are due to expire within the term of the Consolidated Plan. Under Portland's Preservation Ordinance, the City may purchase the properties to preserve affordability of the units. Unless funding is identified for these purchases, these affordable rental units may be converted into condominiums, see dramatic rent increases or be demolished to make room for more lucrative development.

Table 9: Properties at Risk Within the Assisted Housing Inventory, 2011 – 2016

Housing Market Analysis

Low Income Housing Provided by Nonprofits

In addition to subsidizing the development of low-income housing, the city of Portland has a tax exemption program for nonprofit low income housing providers. This program exempts the residential portion of buildings reserved for low income households owned by nonprofit owners from property taxes. Most participants in the program are local community development corporations (CDCs). The total number of units in the program provides a good estimate of the units provided by nonprofit housing providers. (Home Forward, student, and privately-owned rent-restricted low income housing units and homeless shelters are not included in this program.) In 2010, more than 8,500 units owned by more than 40 organizations were assisted by the program. Some organizations own only one property but others own numerous properties with hundreds of units. The City tax exemption is only one of a number of subsidies that support the housing owned and/or managed by these organizations.

To be eligible for the tax exemption, the City requires that the household income of the occupants not exceed 60 percent MFI . The City does not collect any other information about the households served.

Special Needs

According to the 2005-09 American Community Survey, 16% of the total population of Multnomah County had one or more physical or mental disabilities. See Chart 1.

Housing Market Analysis

Chart 1: Percentage of Persons with Disabilities, Multnomah County

Thirty percent of people with disabilities have household incomes below the poverty level, compared with twelve percent of the non-disabled population. Poverty contributes to the fact that people with disabilities are at greater risk of homelessness than the general population. However, people with dual diagnosis (mental illness and substance abuse disorders) are the most likely to experience homelessness. Programs that offer subsidized housing or a combination of subsidized housing and support services are of significant benefit to this population.

Many people with disabilities live in market rate housing and receive few or no services to support their continued independence.

Accessible Housing Inventory

Many people with disabilities live in market rate housing and receive few or no services to support their continued independence. The

Housing Market Analysis

general availability of accessible housing units is not widely known. Additional research is needed to determine if there is a shortage of accessible units. What we do know is that people with disabilities needing units accessible to mobility devices, such as wheelchairs, are often on wait lists for long periods of time before available units are open, and others do not know how to find units of this type.

Developing an accurate inventory of accessible units could greatly increase the housing choice of people with disabilities, focusing outreach to this population and linking them to those units is even more important. Section 504 regulations at 24 CFR 8.27 require that “[funding] recipients take reasonable steps to assure that information on available accessible units reaches otherwise qualified individuals with disabilities who need the features of those units.” Furthermore, if a unit meets the Uniform Federal Accessibility Standards, a housing provider must first offer the unit to a qualified person with a disability that resides in the housing project but not in an accessible unit. If no such person exists, the unit should be offered to the next available qualified person with a disability on the wait list, even if that means skipping other individuals above them on that list.

Permanent Supportive Housing

Beyond meeting all accessibility guidelines that apply to its development of federally-funded affordable housing, The Consortium is not currently developing housing specifically targeted for non-homeless disabled persons, since the City has committed to meet the PSH goals in the 10 year plan. The Consortium funds rent assistance programs that serve, among others, non-homeless disabled and elderly persons. Further, most of the projects produced with Consortium’s funding include both PSH and non-PSH affordable units - some of which are accessible - and some of which will be occupied by non-homeless households that include a member with a disability. A discussion of the facilities and services available to non-homeless people with special needs can be found in the Needs Assessment.

HOPWA

The goal of the HOPWA program is to provide affordable housing and housing-related services to people living with HIV/AIDS (PLWHA). In the Portland Eligible Metropolitan Statistical Area (EMSA), seven

Housing Market Analysis

adjoining counties in Northwest Oregon and Southwest Washington, there are more than 4,0174 people living with HIV/AIDS.

Overall, the composition of PLWHA in the EMSA has remained fairly constant over the past several years, with only slight increases in the percentages of Hispanic and older PLWHA. In the Portland EMSA, HIV has disproportionately impacted African Americans. African Americans account for only 2.9% of the population, but make up 8.0% of PLWA and 8.3% of PLWH – almost three times higher.

The Portland EMSA currently allocates approximately 65% of its HOPWA funds to rent assistance, 25% to support services, 7% to administration, and 3% to Resource Identification. This allocation formula is reviewed annually by the AIDS Housing Advisory Committee.

The City did an RFP for supportive services in the spring of 2009. The contracts awarded through that RFP are renewable for up to a total of four years, dependent on contractor performance. The City is currently in conversation with Ryan White Part A fund to discuss better resource coordination and alignment. What that conversation concludes, the City will determine its future selection process.

Individuals with HIV or AIDS and their families who reside in the seven-county Portland EMSA and have incomes up to 80% MFI are eligible to participate in HOPWA programs. Priority is given to households with incomes below 50% MFI. The EMSA includes Clackamas, Columbia, Multnomah, Washington, and Yamhill Counties in Oregon and Clark and Skamania Counties in Washington.
