

Portland Bird-Friendly Building Design Forum

Thursday, June 14, 2012, 5:30 - 8:30 pm
KEEN, 926 NW 13th Avenue, Portland, OR

Photo ©Bob Sallinger

An estimated one billion birds die annually in the U.S. alone as a result of window collisions. Learn how we can design buildings to make them safer for birds.

Join us for an evening with experts
as we roll out Portland's new draft resource guide for

Bird-Friendly Building Design

June 14, 5:30 - 8:30 pm, KEEN, 926 NW 13th Avenue
Hors d'oeuvres, wine and beer will be served

Architects, Builders and Property Managers!

Learn to integrate bird-friendly design with other design goals. Bird-friendly building guidelines have already been adopted in NYC, Toronto, Chicago, Minnesota and San Francisco, resulting in both innovative designs and reductions in bird fatalities.

Keynote Address

Bruce Fowle, FAIA, LEED, Founding Principal, FXFOWLE Architects
FXFOWLE Architects is an internationally recognized, award-winning New York-based architectural, interior design, planning, and urban design firm committed to design excellence, social responsibility, and sustainability.

Panel Discussion

Bruce Fowle, FAIA, LEED, Founding Principal, FXFOWLE Architects
Christine Sheppard, PhD, Bird Collisions Campaign Manager,
American Bird Conservancy

AnMarie Rodgers, San Francisco Planning Department

Alan Osborne, AIA, LEED AP, Hennebery Eddy Architects

AIA COTE CEU Session, Fri., June 15th, 2012

Innovations in Bird-friendly Design, 9-11 am
