Subject: Comp Plan map app and Citywide systems plan

On the current map app under the Transportation tab, this appears.

Going/Greeley, N: Interchange Improvements

Project Number: 30016

Project Status: Candidate

Lead Agency: PBOT

Project Timeline: TBD

Estimated Cost: \$16,750,000

Redesign Going/Greeley interchange including climbing lane on Going to improve truck movement.

t Map app under the transportation tab, there is a project # 30016

But when I check the Citywide systems plan Proposed Draft , page 309 Appendix A . Investment Strategy , I can not find # 30016. Is # 30016 proposed to be deleted from the TSP ? If # 30016 is proposed to be deleted, then why does it appear on the Map app ?

Linda Bauer

Linda,

Thank you for pointing this out. It looks like there was a clerical error in the creation of the Citywide Systems Plan Proposed Draft in which all the TSP projects with numbers under 30019 were left out. I have emailed BPS staff to make sure they correct the Citywide Systems Plan. The project you mention at Going & Greeley is still among the TSP candidate projects that we will evaluate for this update.
